The Art of Managing Professional Services

With the advent of digital technologies, society is reshaping itself radically. In the last decade, digital technologies have brought fundamental changes in the industry and business environment. The holistic socio-economic and industrial changes are a result of general-purpose technologies such as steam engines, electric power, and computers, which unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently align their business models by deconstructing the traditional value chains. Agile concepts driven by design thinking have been adopted by businesses to create a framework for digital transformation that includes strategy, process, governance, and funding.

IBM, books, and consultancies are feeding the transformation. The exponential growth in data capacity (storage, process, and communication) due to rapid digitalization has driven businesses to create a framework for digital transformation that includes strategy, process, governance, and funding. These three areas are aligned with the transformation of the business environment. The book explains how companies need to align their business models by deconstructing the traditional value chains. Agile concepts driven by design thinking have been adopted by businesses to create a framework for digital transformation that includes strategy, process, governance, and funding.

Daniel S. Siegel in his book The Mind Has No Boundaries points out that the development of technology, especially in the field of artificial intelligence, is a critical factor in shaping the future. Therefore, companies need to align their business models by deconstructing the traditional value chains. Agile concepts driven by design thinking have been adopted by businesses to create a framework for digital transformation that includes strategy, process, governance, and funding. Transforming Business with Program Management Satish P. Subramanian 2015-03-18 Organizations need to constantly innovate and improve products and services to maintain a strong competitive position in the market place. The vehicle used by organizations for such constant reinvention is a business transformation program. This book illustrates a tested program management roadmap along with the supporting comprehensive frameworks to successfully execute business transformation programs, formulated strategies, and strategic initiatives. It outlines the steps to successfully transform any business and deliver tangible business outcomes. This breakthrough work establishes the linkage between strategy formulation and strategy execution through the program management discipline. It depicts how program management integrates strategy, people, process, technology, structure, and measurement on cross-functional initiatives. The author details the processes, techniques, and tools that a program management team can customize and easily implement on any type of strategic initiative within the private or public sector environment to deliver and sustain the expected business outcomes and benefits. This book discusses the ten mandatory steps (or roadmap) needed to lead complex, business transformation programs to success. It showcases program management best practices and lessons learned through real-world case studies spanning different industry sectors and functional domains. Transforming Business with Program Management will equip executives, general managers, and program managers with the core skills necessary to effectively plan and implement business transformation strategies that drive sweeping business change and innovation.
