Walker Evans Walker Evans 2001 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Stable Peace Kenneth E. Boulding 2014-12-15 The human race has often put a high value on struggle, strife, turmoil, and excitement. Peace has been regarded as a utopian, unattainable, perhaps dull ideal or as some random element over which we have no control. However, the desperate necessities of the nuclear age have forced us to take peace seriously as an object of both personal and national policy. Stable Peace attempts to answer the question, If we had a policy for peace, what would it look like? A policy for peace aims to speed up the historically slow, painful, but persistent transition from a state of continual war and turmoil to one of continual peace. In a stable peace, the war-peace system is tipped firmly toward peace and away from the cycle of folly, illusion, and ill will that leads to war. Boulding proposes a number of modest, easily attainable, eminently reasonable policies directed toward this goal. His recommendations include the removal of national boundaries from political agendas, the encouragement of reciprocal acts of good will between potential enemies, the exploration of the theory and practice of nonviolence, the development of governmental and nongovernmental organizations to promote peace, and the development of research in the whole area of peace and conflict management. Written in straightforward, lucid prose, Stable Peace will be of importance to politicians, policy makers, economists, diplomats, all concerned citizens, and all those interested in international relations and the resolution of conflict.

When a Girl Loves an Earl Elisa Braden 2016-08-30 What a girl wants... Miss Viola Darling always gets what she wants. Always. And what she wants more than anything is to marry James Kilbrenner, the Earl of Tannenbrook. She's fallen hard for the giant, taciturn, surly brute, and she positively will have no other. The problem? He's not interested. Not even a little. But Viola cannot afford to lose. And she has her heart set on James. If only he will bend to a bit of persuasion. Is an earl like no other... James Kilbrenner knows how determined the entirely-too-beautiful Miss Darling can be—the daft woman cornered him at a perfectly respectable dinner and mangled his cravat before he could escape. He has no desire to marry, less desire to be pursued, and will certainly not kiss her kissable lips until they are both breathless, no matter how tempted he may be. And only the right one will do... Thrown in her path by a meddling marchioness, James finds himself under sensual siege from a tiny, flirtatious sprite who puts both his heart and his vow to remain unwed at risk. And when scandal looms, he learns the hard way that a man can resist only so long before the indomitable Miss Darling gets her way.

South Asia and World Capitalism Sugata Bose 1990 This book attempts to locate South Asian history within broader supra-regional and world contexts, as well as within the larger historical debates and theories that analyse the shape of the modern world. Contributions to this volume include an essay each by Immanuel Wallerstein and David Washbrook, two by C.A. Bayly, and one each by younger scholars such as Sugata Bose, Ayesha Jalal, Gyan Prakash, and Jayati Ghosh.

Postcolonial Imaginings David Punter 2000 This deeply engaging, historically, and culturally informed book provides new perspectives on a wide range of writers, and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory. It constitutes a major new engagement between the "postcolonial" and a conception of the literary that is richly innovative in its deployment of psychoanalytic, deconstructive, and other approaches to the text. The book begins with some brief background to the issue of decolonization and its contemporary effects. It is informed throughout by a clear sense of literary and political context, within which chosen texts—by well-known writers (Derek Walcott, Chinua Achebe, Edward Kamau Brathwaite) as well as less well-known ones (Joan Riley, Susan Power, Abdulrazak Gurnah) and writers not often seen in a postcolonial context (James Kelman, Seamus Deane, Hanif Kureishi)—can be situated. The chapters that follow are based around themes such as violent geographics; hallucination, dream and the exotic; mourning and melancholy; diaspora and exile; delocalization and the alibi. This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness, but at the same time the political and cultural ambivalence, which underlies postcolonial writing. Throughout the book David Punter continually questions, as one would expect from his many previous books, the definition and scope of the "postcolonial." It is seen throughout as a phenomenon not restricted to the ex- or neo-colonies but as a key characterisation of all our lives at the beginning of the twenty-first century. It is an indissoluble part of the development of national imaginings and, at the same time, an alibi for the emergence of a violently assertive "new world order" committed to the management and obliteration of difference. By juxtaposing texts from different cultural traditions and topographies, from Things Fall Apart to The Bone People, from Ant

Extreme Economies Richard Davies 2020-07-20 To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

The UnGandhian Gandhi Claude Markovits 2004 This major study reconsiders the creation of the Gandhian legend through the myriad texts and images that helped spread it through both India and the Western world. In revealing how the picture of the Mahatma as saint-as-politician was founded on Indian nationalistic selectivity and limited Western representations of Gandhi, Claude Markovits shows how Gandhi's legend has obscured the facts of his public career. Gandhi's professional role in the public sphere, Markovits argues, was heavily influenced by his long and critical phase of maturation in South Africa, a period often dismissed as the precursor to his celebrated work in India. Markovits proposes that Gandhi's later Indian career, marked by his meteoric rise to prominence, was the result of his own radical self-reinvention as he negotiated the pitfalls of political life in order to create his influential political manifesto. In re-evaluating critical stages of Gandhi's career, and his sometimes ambivalent ideological positions, Markovits confronts the discrepancies between his early and late careers, closely rereading the Mahatma's varying intellectual positions as described both within his own writings and in those by commentators and biographers. Rather than seeing Gandhi as an upholder of traditional Indian values, Markovits stresses the paradoxical modernity of Gandhi's anti-modernism. *Scorch* A. D. Nauman 2001-11-20 In the future world of Scorch, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans' fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
