Postcolonial Imaginings David Punter 2000 This deeply engaging, historically, and culturally informed book provides new perspectives on a wide range of writers, and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory. It constitutes a major new engagement between the "postcolonial" and a conception of the literary that is richly innovative in its deployment of psychoanalytic, deconstructive, and other approaches to the text. The book begins with some brief background to the issue of decolonization and its contemporary effects. It is informed throughout by a clear sense of literary and political context, within which chosen texts--by well-known writers (Derek Walcott, Chinua Achebe, Edward Kamau Brathwaite) as well as less well-known ones (Joan Riley, Susan Power, Abdulrazak Gurnah) and writers not often seen in a postcolonial context (James Kelman, Seamus Deane, Hanif Kureishi)--can be situated. The chapters that follow are based around themes such as violent geographics; hallucination, dream and the exotic; mourning and melancholy; diaspora and exile; delocalization and the alibi. This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness, but at the same time the political and cultural ambivalence, which underlies postcolonial writing. Throughout the book David Punter continually questions, as one would expect from his many previous books, the definition and scope of the "postcolonial." It is seen throughout as a phenomenon not restricted to the ex- or neo-colonies but as a key characterisation of all our lives at the beginning of the twenty-first century. It is an indissoluble part of the development of national imaginings and, at the same time, an alibi for the emergence of a violently assertive "new world order" committed to the management and obliteration of difference. By juxtaposing texts from different cultural traditions and topographies, from Things Fall Apart to The Bone People, from Anot

Alphabeatz Woshe 2019-08-20 Graffiti writing was born in the streets of Philadelphia in the late 1960s. This is a writing manual, a detailed

examination of how graffiti writers have developed the twenty-six letters of the alphabet. It includes the contribution of ten of the international scene's most talented creators answer Woshe's questions about matters that include their practice, their relationship with letters and their backgrounds. It includes a map of New York with the sites where the most important graffiti are located.

The UnGandhian Gandhi Claude Markovits 2004 This major study reconsiders the creation of the Gandhian legend through the myriad texts and images that helped spread it through both India and the Western world. In revealing how the picture of the Mahatma as saint-as-politician was founded on Indian nationalistic selectivity and limited Western representations of Gandhi, Claude Markovits shows how Gandhi's legend has obscured the facts of his public career. Gandhi's professional role in the public sphere, Markovits argues, was heavily influenced by his long and critical phase of maturation in South Africa, a period often dismissed as the precursor to his celebrated work in India. Markovits proposes that Gandhi's later Indian career, marked by his meteoric rise to prominence, was the result of his own radical self-reinvention as he negotiated the pitfalls of political life in order to create his influential political manifesto. In re-evaluating critical stages of Gandhi's career, and his sometimes ambivalent ideological positions, Markovits confronts the discrepancies between his early and late careers, closely rereading the Mahatma's varying intellectual positions as described both within his own writings and in those by commentators and biographers. Rather than seeing Gandhi as an upholder of traditional Indian values, Markovits stresses the paradoxical modernity of Gandhi's anti-modernism.

Scorch A. D. Nauman 2001-11-20 In the future world of Scorch, America is run by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

Post-Hindu India Kancha Ilaiah 2009-11-17 Kancha Ilaiah, the author of the best selling book Why I am Not a Hindu, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says is, its anti-scientific and anti-nationalistic stand. This work challenges Hinduism`s interpretation of history, with a virulent attack on caste politics, and also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. It establishes Hinduism as a `backward` religion that suppresses the latent scientific and productive potential of the Dalit-Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of religion and the nation-state. He thus criticizes the idea of spiritual justice or varnadharma, used to justify the caste system, as rooted in spiritual inequality. On a micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit-Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technological processes and events at work in the life of a member of these communities. On a macro level, it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Ilaiah critiques the intellectual imagination of the dominant communities and inspires the marginalized. In the process of doing so he crafts a work of immense socio-political interest which appeals to academics, and also to all those who are concerned about contemporary India`s polity and social fabric.

Stable Peace Kenneth E. Boulding 2014-12-15 The human race has often put a high value on struggle, strife, turmoil, and excitement. Peace has been regarded as a utopian, unattainable, perhaps dull ideal or as some random element over which we have no control. However, the desperate necessities of the nuclear age have forced us to take peace seriously as an object of both personal and national policy. Stable Peace attempts to answer the question, If we had a policy for peace, what would it look like? A policy for peace aims to speed up the historically slow, painful, but persistent transition from a state of continual war and turmoil to one of continual peace. In a stable peace, the war-peace system is tipped firmly toward peace and away from the cycle of folly, illusion, and ill will that leads to war. Boulding proposes a number of modest, easily attainable, eminently reasonable policies directed toward this goal. His recommendations include the removal of national boundaries from political agendas, the encouragement of reciprocal acts of good will between potential enemies, the exploration of the theory and practice of nonviolence, the development of governmental and nongovernmental organizations to promote peace, and the development of research in the whole area of peace and conflict management. Written in straightforward, lucid prose, Stable Peace will be of importance to politicians, policy makers, economists, diplomats, all concerned citizens, and all those interested in international relations and the resolution of conflict.

Walker Evans Walker Evans 2001 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

Extreme Economies Richard Davies 2020-07-20 To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

In the Name of the Poor Neil Webster 2002-02 Current development discourse on poverty reduction mainly emphasizes the respective roles of the state and the market. This book argues for the importance of exploring and understanding the poor's own actions. These actions may seek to change their poverty

directly, or the poor may seek to effect change with respect to the formulation and implementation of public policy.

Spiritual Purification in Islam Gavin Picken 2011-03-21 Purification of the soul is a principle that is central to understanding Islamic spirituality but despite this, relatively little has been written explicitly in the Islamic tradition regarding this discrete method of spiritual purification. This book examines the work of a scholar of this discipline, al-Hārith al-Muhāsibī, who lived and worked during the classical Islamic period under the Abbāsids. Although al-Muhāsibī was well known for his skills in many disciplines, including the Qur’ān, Prophetic narration and scholastic theology, it is his mastery in the field of Islamic spirituality and moral psychology for which he is best remembered. Assessing the extent to which the political, social and economic factors played a part in his life and work, Gavin Picken provides a comprehensive overview of his work and its great significance in the development of Islamic spirituality. Reconstructing his life in chronological order and providing the most comprehensive appraisal of his works to date, it explores a facet of al-Muhāsibī’s teaching which as yet has not been studied, namely his understanding, concept and methodology regarding the purification of the soul within the Islamic paradigm. As such, it will be of great interest not only to researchers and students of Sufism but also to scholars of comparative spirituality and mysticism.
