In the midst of Trump's attacks on the media, comes this look at the rigorous, independent reporting of the year's most underreported news stories. While the country's president displays a brazen disregard for the First Amendment and routinely demonizes the press as "the enemy of the people," *Censored 2020*

looks beyond Donald Trump's dizzying contempt for the truth to clarify the corporate media's complicity in misinforming the American public-- while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, *Censored 2020* focuses the public's attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media's systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year's lowlights in "junk food news" and "news abuse"--further revealing how

corporate news often functions as propaganda--as well as highlights of exemplary organizations that champion "Media Democracy in Action."

Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, "fake news" as a Trojan horse for censorship, and online memes as a form of political communication.

**Postcolonial Imaginings** David Punter 2000 This deeply engaging, historically, and culturally informed book provides new perspectives on a

wide range of writers, and at the same time provides a radically new development of many of the most pertinent issues in the field of postcolonial writing and theory. It constitutes a major new engagement between the "postcolonial" and a conception of the literary that is richly innovative in its deployment of psychoanalytic, deconstructive, and other approaches to the text. The book begins with some brief background to the issue of decolonization and its contemporary effects. It is informed throughout by a clear sense of literary and political context, within which chosen texts--by well-known writers (Derek Walcott, Chinua Achebe, Edward Kamau Brathwaite) as well as less well-known ones (Joan Riley, Susan Power, Abdulrazak Gurnah) and writers

not often seen in a postcolonial context (James Kelman, Seamus Deane, Hanif Kureishi)--can be situated. The chapters that follow are based around themes such as violent geographics; hallucination, dream and the exotic; mourning and melancholy; diaspora and exile; delocalization and the alibi. This profoundly new approach to the complexities of the postcolonial allows the reader to appreciate some of the richness, but at the same time the political and cultural ambivalence, which underlies postcolonial writing. Throughout the book David Punter continually questions, as one would expect from his many previous books, the definition and scope of the "postcolonial." It is seen throughout as a phenomenon not restricted to the ex- or neo-colonies but as a key

characterisation of all our lives at the beginning of the twenty-first century. It is an indissoluble part of the development of national imaginings and, at the same time, an alibi for the emergence of a violently assertive "new world order" committed to the management and obliteration of difference. By juxtaposing texts from different cultural traditions and topographies, from *Things Fall Apart* to *The Bone People*, from Anot **Gandhi** Kuruvila Pandikattu 2001 **Walker Evans** Walker Evans 2001 "As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds

with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."-- Jacket.

**In the Name of the Poor** Neil Webster 2002-02 Current development discourse on poverty reduction mainly emphasizes the respective roles of the state and the market. This book argues for the importance of exploring and understanding the poor's own actions. These actions may seek to change their poverty directly, or the poor may seek to effect change with respect to the formulation and implementation of public policy.

**Stable Peace** Kenneth E. Boulding 2014-12-15 The human race has often put a high value on struggle, strife, turmoil, and excitement. Peace has been regarded as a utopian, unattainable, perhaps dull ideal or as some random element over which we have no control. However, the desperate necessities of the nuclear

age have forced us to take peace seriously as an object of both personal and national policy. *Stable Peace* attempts to answer the question, If we had a policy for peace, what would it look like? A policy for peace aims to speed up the historically slow, painful, but persistent transition from a state of continual war and turmoil to one of continual peace. In a stable peace, the war-peace system is tipped firmly toward peace and away from the cycle of folly, illusion, and ill will that leads to war. Boulding proposes a number of modest, easily attainable, eminently reasonable policies directed toward this goal. His recommendations include the removal of national boundaries from political agendas, the encouragement of reciprocal acts of good will between

potential enemies, the exploration of the theory and practice of nonviolence, the development of governmental and nongovernmental organizations to promote peace, and the development of research in the whole area of peace and conflict management. Written in straightforward, lucid prose, *Stable Peace* will be of importance to politicians, policy makers, economists, diplomats, all concerned citizens, and all those interested in international relations and the resolution of conflict.

**The UnGandhian Gandhi** Claude Markovits 2004 This major study reconsiders the creation of the Gandhian legend through the myriad texts and images that helped spread it through both India and the Western world. In revealing how the picture of the Mahatma as saint-as-politician was founded on Indian nationalistic selectivity and limited Western representations of Gandhi, Claude Markovits shows how Gandhi's legend has obscured the facts of his public career. Gandhi's professional role in the public sphere, Markovits argues, was heavily influenced by his long and critical phase of maturation in

South Africa, a period often dismissed as the precursor to his celebrated work in India. Markovits proposes that Gandhi's later Indian career, marked by his meteoric rise to prominence, was the result of his own radical self-reinvention as he negotiated the pitfalls of political life in order to create his influential political manifesto. In re-evaluating critical stages of Gandhi's career, and his sometimes ambivalent ideological positions, Markovits confronts the discrepancies between his early and late careers, closely rereading the Mahatma's varying intellectual positions as described both within his own writings and in those by commentators and biographers. Rather than seeing Gandhi as an upholder of traditional Indian values, Markovits stresses the

paradoxical modernity of Gandhi's anti-modernism.

**Extreme Economies** Richard Davies  
2020-01-14 A New Statesman best book of the year | New York Times Editors' Choice pick A Financial Times best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population

is the oldest in the world, how these extreme economies function—most often well outside any official oversight—offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, Extreme Economies revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed,

distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, *Extreme Economies* is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions.
