Besh Big Easy John Besh 2015-09-29 In this, his fourth big cookbook, the award-winning chef John Besh takes another deep dive into the charm and authenticity of creole cooking inspired by his hometown, New Orleans. **Besh Big Easy: 101 Home-Cooked New Orleans Recipes**, is a fresh and delightful new look at his signature food. **Besh Big Easy** will feature all new recipes and easy dishes, published in a refreshing new flexibound format and accessible to cooks

everywhere. Much has changed since Besh wrote his bestselling *My New Orleans* in 2009. His restaurant empire has grown from two to twelve acclaimed eateries, from the highly praised Restaurant August to the just opened farm-to-table taqueria, Johnny Sanchez. John's television career has blossomed as well. He's become known to millions as host of two national public television cooking shows based on his books and of *Hungry Investors* on Spike TV. **Besh Big Easy** is dedicated to accessibility in home cooking and Orleans cuisine. "There's no reason a good jambalaya needs two dozen ingredients," John says. In this book, jambalaya has less than ten, but sacrifices nothing in the way of flavor and even offers exciting yet simple substitutions.

Courageous Dreaming Alberto Villoldo 2009-03-01 Modern physics tells us that we're dreaming the world into being with every thought. Courageous Dreaming tells us how to dream our world with

power and grace. The ancient shamans of the Americas understood that we're not only creating our experience of the world, but are dreaming up the very nature of reality itself—that is, "life is but a dream." When you don't dream your life, you have to settle for the nightmare being dreamed by others. This book shows how to wake up from the collective nightmare and begin to dream a life of courage and grace, a sacred dream that shamans throughout time have known and served. Alberto Villoldo reveals ancient wisdom teachings that explain how to birth reality from the invisible matrix of creation; and reveals how we can interact with this matrix to dream a life of peace, health, and abundance. He shows us that courage is all that is required to create

Walker Evans Walker

Evans 2001 "As novelist

and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."-- Jacket.

Java by Comparison Simon Harrer 2018-04 Write code that's clean, concise, and to the point: code that others will read with pleasure and reuse. Comparing your code to that of expert programmers is a great way to improve your coding skills. Get hands-on advice to level up your coding style through small and understandable examples that compare flawed code to an improved solution. Discover handy tips and tricks, as well as common bugs an experienced Java programmer needs to know. Make your way from a Java novice to a master craftsman. This

book is a useful companion for anyone learning to write clean Java code. The authors introduce you to the fundamentals of becoming a software craftsman, by comparing pieces of problematic code with an improved version, to help you to develop a sense for clean code. This unique before-and-after approach teaches you to create clean Java code. Learn to keep your booleans in check, dodge formatting bugs, get rid of magic numbers, and use the right style of iteration. Write informative comments when needed, but avoid them when they are not. Improve the understandability of your code for others by following conventions and naming your objects accurately. Combining the benefits of video training and book learning, Tony Northrup's Lightroom 5 Video Book gives you over 12 hours of video and 250 pages of written content. When you can set aside the time, start the videos on a smartphone, tablet, or PC, and work alongside

Tony & Chelsea in Lightroom. When you'd rather learn away from your PC, or you just want to quickly look something up, search the eBook or flip through the paperback book to find the information you need. Similar video training costs well over \$120 or more, or worse, requires you to pay a monthly membership fee that might cost you thousands. Similar books cost over twice this amount. You also get over 150 Lightroom presets, which usually cost more than \$100, and access to our private Lightroom group on Facebook so you can ask questions and get feedback. Tony covers every aspect of Lightroom in-depth, but structures his teaching so that both beginner and advanced photographers can learn as efficiently as possible. If you just

Extreme Economies

Richard Davies

2020-07-20 To predict
our future, we must look
to the extremes. So
argues the economist
Richard Davies, who
takes readers to the
margins of the modern
economy and beyond.
These extreme economies
illustrate the forces
that test human
resilience, drive
societies to failure,
and promise to shape our

collective future.
Reviving a foundational
idea from the medical

logic of modern
economics on its head by
arguing that these

societies are pioneering
the economic

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids.

You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the

latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Cataract City Craig Davidson 2014-02-06
Cataract City, a dead-end border town overlooking Niagara Falls. Owen Stuckey and Duncan Diggs are fast friends as kids - united by wrestling, go-karts, and metal bands - but as they grow into young

men, their once simple affection competes with the tensions created by their respective circumstances. Owen, born to relative privilege, seems destined to get out of the city, while Duncan, honest but hard, is hurtling along the rails towards a future working the assembly line at the soulless biscuit factory, The Bisk. As Duncan becomes more and more desperate to escape, he finds himself at opposite ends of the law to Owen, and as the coils of the city creep ever tighter around the two friends, they find themselves struggling not to break free, but simply to survive.

into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a

number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.
