He must add to this the patience to collect all the evidence which can be found bearing upon the case in hand, together with the ability to weigh this evidence to a nicety and to determine clearly the course pointed out by the balance of probability. If, in addition, he possesses enough imagination to cast pleasant lights across the desert of dry details, he should be successful indeed. The watchwords of the surveyor are Patience and Common Sense. The vocation of the Civil Engineer has always been invested with a dignity of its own....
