Survival Guns Mel Tappan 2009-11-01 When he wrote Survival Guns in 1979, Mel Tappan demonstrated that having the right weapons for securing food and providing personal defense is the key to sustaining life on an independent basis, whether or not a catastrophe occurs. This is even more true today. Survival Guns became the standard in its own time and went through several printings. When it finally went out of print, it graduated from a classic to a sought-after collector's item, because the principles and advice in this well-reasoned volume are sound and perennially valuable. Some new guns and some new calibers have become available since this book was first published, but its principles, advice, and value remain unchanged. Having more choices only increases the value of advice on how to choose what is best for you. As used copies of this book became harder and harder to find, Paladin received numerous requests to bring Tappan's classic back into print. We are pleased to make the most well-known survival firearms book ever published available once more to a new generation of concerned citizens facing the same threats Tappan chronicled during his lifetime. Survival Guns remains the definitive book for anyone interested in the practical use of firearms and related weapons for defense, food gathering, and predator and pest control under conditions of long-term, self-sufficient living.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

MADISON AVENUE, OHIO, 1970- Wallace J. Gordon 2010-06-04 All the best ads and commercials are written in high-powered advertising agencies in New York City, right? In fancy offices perched high on the gleaming towers of Manhattan, right? By mythical creatures just returning from three martini lunches, right? Wrong, wrong, wrong. And once more, just for good measure. Once upon a time I was fired. Again. I'd been writing ads for agencies in Chicago, Detroit, Minneapolis and New York. For almost twenty years. Then one day I found myself writing them in the sometimes sleepy, sometimes far from sleepy little city of Marion, Ohio. How I got there, what I did there, and all the rest of it makes a rather interesting story. At least to me. Although Gertrude Stein famously said, "There's no there there," don't believe it for a minute. She sure wasn't talking about Marion, Ohio. Read on, gentle reader, read on...
