Fire and Emergency Services Company Officer IFSTA 2014-11-14 This new IFSTA manual details the training required of Company Officers according to NFPA® 1021, Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition of Fire and Emergency Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA's single-column format and upgraded and updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The Feminist Case Against Bureaucracy Kathy E. Ferguson 1984 "Like it or not, all of us who live in modern society are organization men and women. We tend to be caught in the traditional patterns of dominance and subordination. This book is both pessimistic and hopeful. With devastating thoroughness, the author shows how pervasive these patterns of relationship are in our work lives and personal lives, and how deep they run -- into the very language of the organization and of ordinary life. This is not a book about how women can succeed in business, but a criticism of books like those success manuals and notions like that idea of success. The author sees bureaucrats and clients as the 'second sex'. To fit in properly, they just learn the skills necessary to cope with subordinate status, skills that women have always learned as part of their 'femininity'. Liberal reforms -- placing more women in management positions, for example -- are not enough. What is required is the emergence of an alternative voice, one grounded in the experience and perceptions of women, that will challenge the patterns of control found in every aspect of modern life. Public discourse today is not the language of women even when women speak it. In this brilliant synthesis of the feminist

literature and the literature on organizational theory and practice, the author suggests how a feminist discourse could interject into public debate a reformulation of the basic political questions of power, reason, and organization and thereby legitimate a concern of both autonomy and community. In the face of the massive incursions of bureaucracy into daily life, this is an important contribution to the project of human liberation."--Publisher description.

*Applicant to Police Cadet* Xavier Wells 2019-01-21 6 years, that's the time it took me from my first Police application to my first Hiring letter. It's a little-known fact for many starting out, and a very real reality for most that are in the process; that most Applicants don't make it through the hiring process on their first time out. I've probably made all of the mistakes there are to make, from not being prepared for Oral Boards and turning in inaccurate applications. This book doesn't just teach you how to be a standout applicant; it show's how to pick agencies, what Departments look for, and how to plan out your selections so that it benefits not only you but your family as well. In the end, I hope you avoid the hiring process pitfalls that plague so many and learn how to skyrocket the top of any hiring list, in a shorter time than it took me.
