As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped traders. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere.At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from $1 to over $55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at $4 and sold them at over $10. On my very first beginner trade, I made $6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire $6,000 by making a few mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money.Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down at my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends.Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening.
Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I’ve experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It’s my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It’s concise. It’s practical. It’s written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in this book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I’m a real person who you can connect with. I’m not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It’s honest. You’ll see I lose some days. You can read the blog post. I know how much you learn about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com. Endorsed by the Mayo Clinic and others in the medical community, the ketogenic diet has been proven as a healthy, effective way of achieving weight loss, as it consists of low-carb, high fat foods that prompt the body to burn fat for energy instead of glucose.

It is not uncommon to see men in their 80s and even 90s practicing karate in the early morning. I believe it’s important to both live a long life and have the energy and vitality to enjoy it. Which is why this Okinawa recipe book was created to show the recipes of the most famous Blue Zone island.

EAT. SLEEP. MOVE. BREATHE Lars Thestrup 2020-11-30 Too often, books on health and wellness are too long and cumbersome to motivate the reader. Thick books weighed down with technical jargon can be overwhelming for the average person. This book remedies that by focusing on four pillars of health: eating cleaner, sleeping better, moving more, and calming your mind. With brief sections, a conversational style, and anecdotal stories, the authors have drafted a book that can not only inform the average reader, but inspire us all to take the first steps toward living our best life. Endorsement: I love this book! If you asked me to take decades of experience working at the bleeding edge of human athletic performance and boil it to the most essential behaviors for long term, sustainable success, it would be this book! The trick to unlocking our incredibly robust and antifragile natures is to appreciate the way that the keystone behaviors in this book integrate into a cogent whole. Performing these "basics" well for the rest of your life will never get old or go out of style. The principles within these pages are the fundamentals of being a truly savage human. -Dr. Kelly Starrett, DPT, Coach, Physio, Co-Founder of The Ready State 2x NYT Best Selling Author.
