imagined the trials awaiting our family after the proceedings ended. This story is about a young boy named Peter. His parents, who were both designers, never really spoke about their adoption. The harrowing custody battle that shaped an otherwise beautiful childhood, and my mother’s battle with cancer, forced me to look at the world in shades of gray at a younger age than I would have preferred. Through this trauma, and our family’s stories about adoption, I learned that the people who helped me stand out when I wanted to fit in. I yearned to be an average child, but people kept asking me about the two women who came to pick me up from school every day. “Are they your parents?” “Are they your family?” When I responded to their queries began to dovetail into deeper stories, explaining not only my life, but my viewpoints as well. One day a college professor discovered one of these viewpoints in one of my papers and suggested that I should write a book about my experiences. Although the idea of writing a book was daunting, the prospect of opening up my life to multitudes of people I didn’t know was harder. However, I was hopeful that with the publication of Love Our Way, my grandmother’s questioning of my sexuality, to the first time I was ever told my parents were going to hell: every moment was important, and every event became a chance to become a better person and make a difference in the world.

Love Our Way: The adoption business was founded on the notion that adoption is a way to give every child a family. However, the reality is that adoption is often not about giving children a family but rather about adopting children as a means to an end. The adoption business is often driven by profit and the religious ideology that adoption is a way to fulfill the desire for a family. Dr. Mike Scanlon’s experience with two adopted children who were later revealed to be part of an adoption scandal dramatically illustrates in Margaret and David’s tale--one they share with millions of Americans—a profound message: that the adoption business is often driven by profit and the religious ideology that adoption is a way to fulfill the desire for a family.

China’s Hidden Children Kay Ann Johnson 2016-03-21 In the thirty-five years since China instituted its one-child policy, over 140 million children were denied the right to be adopted, including 85,000 to the United States. It’s generally assumed that this diaspora is the result of China’s approach to population control, but there is also the underlying belief that the majority of the children who were denied the legal right to be adopted were also a reflection of the national preference for a son. While there is some truth to this, it does not tell the full story—a story with deep personal resonance to Kay Ann Johnson, a Chinese scholar and mother to an adopted Chinese daughter. China’s Hidden Children dramatically illustrates how official policies that were designed to reduce population growth and enhance the national pride in numbers and the “shadow” children who were born outside the official marriage, but not publicly acknowledged, were also a reflection of the national preference for a son. Johnson spent years talking with the Chinese parents driven to relinquish their children because of this preference, and her book is a powerful testament to the pain and suffering of this “shadow,” which have evolved throughout the history of cosmetics. This is an ideal reference for professionals and enthusiasts who are interested in the historical evolution of cosmetics and its impact on modern-day culture.

Babies for Sale? Serena Davies 2017-03-15 Transnational surrogacy—the creation of babies across borders—has become big business. Globalization, reproductive technologies, new family formations, and increased interest in intercultural marriage have combined to create a robust market for baby-making. By 2010, the global baby industry was valued at over $4 billion, and it continues to grow as demand increases. The global surrogacy industry is a multi-billion dollar business that includes surrogacy agencies in India, Nepal, Thailand, and the United States. Surrogacy is often marketed as a way to have a child, and the industry is highly regulated by governments. However, the reality is that the industry is fueled by profit and the religious ideology that adoption is a way to fulfill the desire for a family.

foster care system and its effects on black communities and the country as a whole. Tying the origins and impact of this disparity to racial injustice, Dorothy Roberts contends that child-welfare policy reflects a political choice. To address startling rates of black child poverty by punishing parents instead of tackling poverty’s societal roots. Using conversations with mothers battling the Chicago child-welfare system for custody of their children, along with national data, Roberts levels a powerful indictment of racial disparities in foster care and tells a moving story of the women and children who earn our respect in their fight to keep their families intact.

Do Parents Matter? Robert A. LeVine 2016-09-06 When it comes to parenting, more isn’t always better—but it is always more tiring. In Japan, a boy sleeps in his parents’ bed until age ten, but still shows independence in all other areas of his life. In rural India, toilet training begins one month after infants are born and is accomplished with little fanfare. In Paris, parents limit the amount of agency they give their toddlers. In America, parents grant them ever more choices, independence, and attention. Given our approach to parenting, is it any surprise that American parents are too frequently exhausted? Over the course of nearly fifty years, Robert and Sarah LeVine have conducted a groundbreaking, worldwide study of how families work. They have consistently found that children can be happy and healthy in a wide variety of conditions, not just the effort-intensive, cautious environment so many American parents drive themselves crazy trying to create. While there is always another news article or scientific fact proclaiming the importance of some factor or other, it’s easy to miss the bigger picture: that children are smarter, more resilient, and more independent than we give them credit for. Do Parents Matter? is an eye-opening look at the world of human nurture, one with profound lessons for the way we think about our families.

Life Inc Douglas Rushkoff 2011-03-31 Douglas Rushkoff was mugged outside his apartment on Christmas Eve, but when he posted a friendly warning on his community website, the responses castigated him for potentially harming the local real-estate market. When did these corporate values overtake civic responsibilities? Rushkoff examines how corporatism has become an intrinsic part of our everyday lives, choices and opinions. He demonstrates how this system created a world where everything can be commodified, where communities have dissolved into consumer groups, where fiction and reality have become fundamentally blurred. And, with this system on the verge of collapse, Rushkoff shows how the simple pleasures that make us human can also point the way to freedom.

The Fabric of Theology Richard Lints 1993 After showing that today’s evangelicals have not fared well in the crucible of modern pluralism, Lints argues that in order to regain spiritual wholeness, evangelicals must relearn how to think and live theologically. He provides a provocative new outline for the construction of a truly “transformative” evangelical theology in the modern age.
