**Gendered Citizenship** Natasha Behl 2019-07-03 It has been shown time and again that even though all citizens may be accorded equal standing in the constitution of a liberal democracy, such a legal provision hardly guarantees state protections against discrimination and political exclusion. More specifically, why do we find pervasive gender-based discrimination, exclusion, and violence in India when the Indian Constitution supports an inclusive democracy committed to gender and caste equality? In Gendered Citizenship, Natasha Behl offers an examination of Indian citizenship that weaves together an analysis of sexual violence law with an in-depth ethnography of the Sikh community to explore the contradictory nature of Indian democracy—which gravely affects its institutions and puts its citizens at risk. Through a situated analysis of citizenship, Behl upends longstanding academic assumptions about democracy, citizenship, religion, and gender. This analysis reveals that religious spaces and practices can be sites for renegotiating democratic participation, but also uncovers how some women engage in religious community in unexpected ways to link gender equality and religious freedom as shared goals. Gendered Citizenship is a groundbreaking inquiry that explains why the promise of democratic equality remains unrealized, and identifies potential spaces and practices that can create more egalitarian relations.

Her Right To Equality

Nisha Agrawal 2021-03-08

The sixth volume in the Rethinking India series, in collaboration with the Samruddha Bharat Foundation, looks at the reality of gender equality in the country against the promises of justice and equality made in the Constitution of India. What it finds is that even today, India remains an unequal country and that women control, at best, about 10-15 per cent of economic and political resources. While there has been progress in some areas, in many other areas there has been very little and uneven change. One of the main reasons for this slow progress is that social norms that assign
particular roles and identities to men and women are 'sticky' and hard to change. In India, a highly patriarchal society, these norms give very little power to women and, consequently, they have little control or influence over decisions taken within their households, in markets or in political spaces. Challenging the status quo can cause a backlash, leading to high levels of violence against women in the domestic sphere, the workplace and in public places. If we are to see a more safe, just and equal society by 2047, a hundred years after Independence, it cannot be business as usual. Her Right to Equality argues that what we require is disruptive change through individual and collective leadership and action.
