Fitzgerald's insight will change forever how you perceive the challenges you face, giving you the inspiration and the ability to build mental endurance and physical stamina. When bestselling sportswriter Matt Fitzgerald went through a crisis in his writing career, the New York Times sports writer and New Yorker contributor turned his own challenges into a framework to assess the implications of new genetic technologies. Parthasarathy argues that differences in the genetic makeup of individuals may help explain why some athletes have more success in competitive sports than others.

The Contract Date: 1940-12-27
The 9 New York Times bestselling Contract series, The Comeback Quotient combines gripping sports stories with cutting-edge science. It's the groundbreaking book that will change the way you think about your body, your mind, and your career. This thoughtful and engaging read will inspire you to reach your full potential in any field.

It's a must-read for anyone looking to enhance their mental game and improve their overall well-being.

The Gene: An Intimate History
Siddhartha Mukherjee's The Gene is a mesmerizing exploration of the science of genetics. It tells the story of how human beings have come to understand the fundamental building blocks of life. The book is written in a clear and engaging style, making it accessible to readers of all backgrounds.

Range: The Search for General Excellence
Edward H. Deci and Richard M. Ryan

Range: The Search for General Excellence
Range: The Search for General Excellence is a thought-provoking book that explores the concept of general excellence. The authors argue that people who are good at a wide variety of things—artists, musicians, inventors, forecasters and scientists—are more creative, more agile, and able to make connections their more specialized peers can't see.
