hero we ever had. In this groundbreaking biography, Pulitzer Prize-winning journalist Richard Ben Cramer presents a shocking portrait of a complicated, enigmatic life. The story that DiMaggio never wanted told, tells of his grace—and greed; his dignity, pride—and hidden shame. It is a story that sweeps through the twentieth century, bringing to light not just America's national game, but the birth (and the price) of modern national celebrity.

The History of Bees Maja Lunde 2017-08-22 “Imagine The Leftovers, but with honey” (Elle), and in the spirit of Station Eleven and Never Let Me Go, this “spectacular and deeply moving” (Lisa See, New York Times bestselling author) novel follows three generations of beekeepers from the past, present, and future, weaving a spellbinding story of their relationship to the bees—and to their children and one another—against the backdrop of an urgent, global crisis. England, 1852. William is a biologist and seed merchant, who sets out to build a new type of beehive—one that will give both him and his children honor and fame. United States, 2007. George is a beekeeper fighting an uphill battle against modern farming, but hopes that his son can be their salvation. China, 2098. Tao hand paints pollen onto the fruit trees now that the bees have long since disappeared. When Tao’s young son is taken away by the authorities after a tragic accident, she sets out on a grueling journey to find out what happened to him. Haunting, illuminating, and deftly written, The History of Bees joins “the past, the present, and a terrifying future in a riveting story as complex as a honeycomb” (New York Times bestselling author Bryn Greenwood) that is just as much about the powerful bond between children and parents as it is about our very relationship to nature and humanity.

Sabriel Garth Nix 2009-10-06 Game of Thrones fans will love the New York Times bestselling Abhorsen series. Sabriel, the first installment in the trilogy, launched critically acclaimed author Garth Nix onto the
fantasy scene as a rising star. Dark Secrets, Deep Love, and Dangerous Magic. Sent to a boarding school in Ancelstierre as a young child, Sabriel has had little experience with the random power of Free Magic or the Dead who refuse to stay dead in the Old Kingdom. But during her final semester, her father, the Abhorsen, goes missing, and Sabriel knows she must enter the Old Kingdom to find him. She soon finds companions in Mogget, a cat whose aloof manner barely conceals its malevolent spirit, and Touchstone, a young Charter Mage long imprisoned by magic, now free in body but still trapped by painful memories. As the three travel deep into the Old Kingdom, threats mount on all sides. And every step brings them closer to a battle that will pit them against the true forces of life and death—and bring Sabriel face-to-face with her own destiny.

"Sabriel is a winner, a fantasy that reads like realism. Here is a world with the same solidity and four-dimensional authority as our own, created with invention, clarity and intelligence." —Philip Pullman, author of His Dark Materials trilogy

**Stray** Andrea K Höst 2011

On her last day of high school, Cassandra Devlin walked out of exams and into a forest. Surrounded by the wrong sort of trees, and animals never featured in any nature documentary, Cass is only sure of one thing: alone, she will be lucky to survive. The sprawl of abandoned blockish buildings Cass discovers offers her only more puzzles. Where are the people? What is the intoxicating mist which drifts off the buildings in the moonlight? And why does she feel like she's being watched? Increasingly unnerved, Cass is overjoyed at the arrival of the formidable Setari. Whisked to a world as technologically advanced as the first was primitive, where nanotech computers are grown inside people's skulls, and few have any interest in venturing outside the enormous whitestone cities, Cass finds herself processed as a 'stray', a refugee displaced by the gates torn between worlds. Struggling with an unfamiliar language and culture, she must adapt to virtual classrooms, friends who can teleport, and the ingrained attitude that strays are backward and slow. Can Cass ever find her way home? And after the people of her new world discover her unexpected value, will they be willing to let her leave? **Parentology** Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wised...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.
