Tough Love Pauline Neff 1996 Tough Love is hope. It is help. It is a way of recovery for drug abusers, and a positive, supportive program for their families. Tough Love is a gift of love and a gift of life for those who practice its plan. It is a book for all parents, especially those whose children are now on drugs or are exposed to those who use drugs. Pauline Neff has gathered enthralling, real-life accounts of young drug users who needed help and of their parents' role in seeing that they received it. Eight families describe, in very graphic, heartrending terms, how their children successfully beat the drug habit through The Palmer Drug Abuse Program. PDAP is a privately financed twelve-step program, similar to the steps of AA. Ms. Neff explains each step to show how families can interpret and work through these steps in their own lives. Thousands of young people have found help through this method. Families have been reunited, and parents' own lives have been changed drastically in the process. If you are a parent of a young person in America today, Tough Love may be the most important book you will ever read. It may save your life.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows...
kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time. **Home, School, and Community Relations** Carol Gestwicki 2015-01-01 This practical, comprehensive text is an indispensable guide for home-school-community collaborations. Key issues covered include: Key sociological concepts and perspectives Contemporary developments in pharmacy practice and pharmacy’s professional status A review of research into the way people react to illness and look after their health How and why illness and disease are influenced by gender, ethnicity, and social class Health education and pharmacists’ role in promoting health and ensuring appropriate medicine usage Social research methods Pharmacists are frequently encouraged to broaden their day-to-day practice. This timely book does just that by encouraging pharmacists to become more involved with advising clients, managing medicines, and supporting the promotion of health.
