**Tough Love** Pauline Neff 1996 Tough Love is hope. It is help. It is a way of recovery for drug abusers, and a positive, supportive program for their families. Tough Love is a gift of love and a gift of life for those who practice its plan. It is a book for all parents, especially those whose children are now on drugs or are exposed to those who use drugs. Pauline Neff has gathered enthralling, real-life accounts of young drug users who needed help and of their parents' role in seeing that they received it. Eight families describe, in very graphic, heartrending terms, how their children successfully beat the drug habit through The Palmer Drug Abuse Program. PDAP is a privately financed twelve-step program, similar to the steps of AA. Ms. Neff explains each step to show how families can interpret and work through these steps in their own lives. Thousands of young people have found help through this method. Families have been reunited, and parents' own lives have been changed drastically in the process. If you are a parent of a young person in America today, Tough Love may be the most important book you will ever read. It may save your life.

Covers the nonsense-mediated mRNA decay (NMD) or mRNA surveillance pathway. Expert researchers introduce the most advanced technologies and techniques to identify mRNA processing, transport, localization and turnover, which are central to the process of gene expression. Sociology for Pharmacists Kevin M. G. **Standard C++ IOStreams and Locales**  
Angelika Langer 2000

Standard C++ provides a foundation for creating new, improved, and more powerful C++ components. IOStreams and locales are two major components for text internationalization. As critical as these two APIs are, however, there are few resources devoted to explaining them. "Standard C++ IOStreams and Locales" fills this informational gap. It provides a comprehensive description of, and reference to, the iostreams and locales classes, showing how to put them to use and offering advanced information on customizing and extending their basic operation. Written by two experts involved with the development of the standard, this book reveals the rationale behind the design of the APIs and points out their potential pitfalls. This book serves as both a guide and a reference to C++ components. Part I explains iostreams, what they are, how they are used, their underlying architectural concepts, and the techniques for extending the iostream framework. Part II introduces internationalization and shows you how to adapt your program to local conventions. Readers seeking an initial overview of the problem domain will find an explanation of what internationalization and localization are, how they are related, and how they differ. With examples, the authors show the differences among cultural conventions, how C++ locales can be used to address such differences, and how locale framework can be extended to handle further, nonstandard cultural conventions. "Standard C++ IOStreams and Locales" Explains formatting and error indication features of iostreams in detail Describes underlying concepts of the iostreams framework Demonstrates implementation of i/o operations for user-defined types Shows techniques for implementing extended stream and stream buffer classes Introduces internationalization Explains how to use standard features for internationalization Demonstrates techniques for implementation of user-defined internationalization services IOStreams and locales serve as a foundation library that provides a number of ready-to-use interfaces, as well as frameworks that can be customized and extended. The class reference to C++ IOStreams and locales completes this comprehensive resource, which belongs in the libraries of all intermediate and advanced C++ programmers.

In this sparkling collection of nineteen stories, the bestselling author of Slammerkin returns to contemporary affairs, exposing the private dilemmas that result from some of our most public controversies. A man finds God and finally wants to father a child—only his wife is now forty-two years old. A coach's son discovers his sexuality on the football field.
