Act of War Jack Cheevers 2014-12-02 WINNER OF THE SAMUEL ELIOT MORISON AWARD FOR NAVAL LITERATURE "I devoured Act of War the way I did Flyboys, Flags of Our Fathers and Lost in Shangri-la."—Michael Connelly, #1 New York Times Bestselling Author In 1968, the small, dilapidated American spy ship USS Pueblo set out to pinpoint military radar stations along the coast of North Korea. Though packed with advanced electronic-surveillance equipment and classified intelligence documents, its crew, led by ex-submarine officer Pete Bucher, was made up mostly of untested young sailors. On a frigid January morning, the Pueblo was challenged by a North Korean gunboat. When Bucher tried to escape, his ship was quickly surrounded by more boats, shelled and machine-gunned, forced to surrender, and taken prisoner. Less than forty-eight hours before the Pueblo's capture, North Korean commandos had nearly succeeded in assassinating South Korea's president. The two explosive incidents pushed Cold War tensions toward a flashpoint. Based on extensive interviews and numerous government documents released through the Freedom of Information Act, Act of War tells the riveting saga of Bucher and his men as they struggled to survive merciless torture and horrendous living conditions set against the backdrop of an international powder keg.

The Piano Susan Tomes 2021 A fascinating history of the piano explored through 100 pieces chosen by one of the UK's most renowned concert pianists "Tomes . . . casts her net widely, taking in chamber music and concertos, knotty avant-garde masterworks and (most welcome) jazz."--Richard Fairman, Financial Times, "Best Books of 2021: Classical Music" "[One] of the most beautiful books I got my hands on this year. . . . About the shaping of this maddening, glorious, unconquerable instrument."--Jenny Colgan, Spectator, "Books of the Year" An astonishingly versatile instrument, the piano allows just two hands to play music of great complexity and subtlety. For more than two hundred years, it has brought solo and collaborative music into homes and concert halls and has inspired composers in every musical genre—from classical to jazz and light music. Charting the development of the piano from the late eighteenth century to the present day, pianist and writer Susan Tomes takes the reader with her on a personal journey through 100 pieces including solo works, chamber music, concertos, and jazz. Her choices include composers such as Bach, Mozart, Beethoven, Robert Schumann, Tchaikovsky, Debussy, Gershwin, and Philip Glass. Looking at this history from a modern performer's perspective, she acknowledges neglected women composers and players including Fanny Mendelssohn, Maria Szymanowska, Clara Schumann, and Amy Beach.

Computers Helping People with Special Needs Klaus Miesenberger 2008-07-04 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all con- nents to ICCHP. The International Programme Committee, encompassing 102 experts form all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the me- ing into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the - portance of giving access to ICT and AT at a global level. In another keynote by H- old Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.
