**Digital Jihad** Erik Skare 2016-10-15 A new and innovative form of dissent has emerged in response to the Israeli occupation of Palestine. Dubbed "electronic jihad", this approach has seen organized groups of Palestinian hackers make international headlines by breaching the security of such sites as the Tel Aviv Stock Exchange, AVG, Avira, Whatsapp, and BitDefender. Though initially confined to small clandestine groups, "hacktivism" is now increasingly being adopted by militant Palestinian parties, including Hamas and Palestinian Islamic Jihad, who have gone so far as to incorporate hackers into their armed brigades. Digital Jihad is the first book to explore this rapidly evolving and still little understood aspect of the Palestinian resistance movement. Drawing on extensive interviews with hackers and other activists, it provides a unique and fascinating new perspective on the Palestinian struggle.

*The Automotive Industry and European Integration* A. J. Jacobs 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

**BIM Handbook** Rafael Sacks 2018-07-03 Discover BIM: A better way to build better buildings Building Information Modeling (BIM) offers a novel approach to design, construction, and facility management in which a digital representation of the building product and process is used to facilitate the exchange and interoperability of information in digital format. BIM is beginning to change the way buildings look, the way they function, and the ways in which they are designed and built. The BIM Handbook, Third Edition provides an in-depth understanding of BIM technologies, the business and organizational issues associated with its implementation, and the profound advantages that effective use of BIM can provide to all members of a project team. Updates to this edition include: Information on the ways in which professionals should use BIM to gain maximum value New topics such as collaborative working, national and major construction clients, BIM standards and guides A discussion on how various professional roles have expanded through the widespread use and the new avenues of BIM practices and services A wealth of new case studies that clearly illustrate exactly how BIM is applied in a wide variety of conditions Painting a colorful and thorough picture of the state of the art in building information modeling, the BIM Handbook, Third Edition guides readers to successful implementations, helping them to avoid needless frustration and costs and take full advantage of this paradigm-shifting approach to construct better buildings that consume fewer materials and require less time, labor, and capital resources.

**Detroit's Michigan Central Station** Kelli B. Kavanaugh 2001 In 1913, the Michigan Central Station opened its majestic entrances to the people of Detroit. Designed by Warren & Wetmore and Reed & Stern, the firms also noted as the architects of the Grand Central Station in New York City, the depot was a marvel of grandeur and comfort for the traveler lucky enough to utilize its facilities. Soldiers went to war, families both separated and rejoined, and folks looking for an honest living in the Motor City all walked the Michigan Central's elegant corridors. Since the last train pulled away from the station in 1988, the structure has fallen prey to rapidly paced deterioration. Detroit's Michigan Central Station captures the glory of the Michigan Central and its environs. Using photographs from the Burton Historical Collection, as well as private collections, the book illustrates the use of the Michigan Central Station by a city whose story dramatically parallels that of this magnificent structure. The book also includes imagined futures of the station from some of the many people who have been inspired by the magic this grand building continues to exude.

*Zero Carbon Car* Brian Long 2013-03-01 The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation.Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in environmentally friendly engine technology; Electric cars; Environmental issues in material usage and car body manufacture. A wide-ranging survey of the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint.Written in an easy-to-understand manner, the book enables the reader to fully understand what is meant by 'global warming'.Examines alternative fuels, material usage and the motive power options available to us.Superbly illustrated with 350 colour photographs.Brian Long is a professional writer and motoring historian with over sixty books to his credit.

**The Seat of the Antichrist** Erika Grey 2010-02-15 The Seat of The Antichrist: Bible Prophecy and The European Union identifies the European Union as the final world empire and explains what Bible Prophecy predicts will occur in the end times.The reader discovers the relationship between Bible Prophecy, the European Union and today's current affairs. The Seat of the Antichrist details the European Union's history and institutional structure and shows how it aligns with Bible Prophecy. Bible Prophecy comprises one third of the Bible. The Bible's last book, The Revelation, predicts the events leading to the end of the world. It provides the details for the Tribulation, which occur during a seven year period of wars, plagues, earthquakes and calamities, which end in the battle of Armageddon. Part of the earth's judgments happen through a leader who rises to power from the final world empire predicted in Bible Prophecy. Evangelical Christians customarily refer to this leader as The Antichrist. The Seat of the Antichrist is the first book dealing with Bible Prophecy, which shows prophecy's relation in the present geopolitical framework and in doing so dismisses end-time conspiracy theories, which Bible Prophecy works often rely on. No book dealing with Bible Prophecy provides such in-depth analysis and extensive research as The Seat of the Antichrist: Bible Prophecy and The European Union, which presents the reader with a gripping, riveting expose.

**Foundations of Computational Intelligence** Ajith Abraham 2009-05-01 Foundations of Computational Intelligence Volume 6: Data Mining: Theoretical Foundations and Applications Finding information hidden in data is as theoretically difficult as it is practically important. With the objective of discovering unknown patterns from data, the methodologies of data mining were derived from statistics, machine learning, and artificial intelligence, and are being used successfully in application areas such as bioinformatics, business, health care, banking, retail, and many others. Advanced representation schemes and computational intelligence techniques such as rough sets, neural networks; decision trees; fuzzy logic; evolutionary algorithms; arti- cial immune systems; swarm intelligence; reinforcement learning, association rule mining, Web intelligence paradigms etc. have proved valuable when they are - plied to Data Mining problems. Computational tools or solutions based on intel- gent systems are being used with great success in Data Mining applications. It is also observed that strong scientific advances have been made when issues from different research areas are integrated. This Volume comprises of 15 chapters including an overview chapter providing an up-to-date and state-of-the research on the applications of Computational Int- ligence techniques for Data Mining. The book is divided into 3 parts: Part-I: Data Click Streams and Temporal Data Mining Part-II: Text and Rule Mining Part-III: Applications Part I on Data Click Streams and Temporal Data Mining contains four chapters that describe several approaches in Data Click Streams and Temporal Data Mining.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Making the Grade William A. Fischel 2009-11-15 A significant factor for many people deciding where to live is the quality of the local school district, with superior schools creating a price premium for housing. The result is a "race to the top," as all school districts attempt to improve their performance in order to attract homebuyers. Given the importance of school districts to the daily lives of children and families, it is surprising that their evolution has not received much attention. In this provocative book, William Fischel argues that the historical development of school districts reflects Americans' desire to make their communities attractive to outsiders. The result has been a standardized, interchangeable system of education not overly demanding for either students or teachers, one that involved parents and local voters in its governance and finance. Innovative in its focus on bottom-up processes generated by individual behaviors rather than top-down decisions by bureaucrats, Making the Grade provides a new perspective on education reform that emphasizes how public schools form the basis for the localized social capital in American towns and cities.

**Glocalized Solutions for Sustainability in Manufacturing** J rgen Hesselbach 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing and end-of-life-management. The theme "Glocalized Solutions for Sustainability in Manufacturing" addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services and processes taking into account local capabilities and constraints to achieve an economically, socially and environmentally sustainable society in a global perspective. Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local capabilities as well as local constraints have to be drivers for product- and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas.

Bryant Jensen 2012 The "Latino Education Crisis" not only threatens to dash the middle class aspirations of the nation's largest immigrant group, it is also an ominous sign for democratic engagement and global competitiveness for U.S. society as a whole. This timely book argues that this crisis is more aptly characterized as a "Mexican Education Crisis." This book brings together voices that are rarely heard on the same stage—Mexican and U.S. scholars of migration, schooling, and human development—to articulate a new approach to Mexican-American schooling: a bi-national focus that highlights the interpersonal assets of Mexican-origin children. Contributors document the urgency of adopting this approach and provide a framework for crossing national and disciplinary borders to improve scholarship, policy, and practice associated with PreK–12 schooling. Contributors: James D. Bachmeier, Frank D. Bean, Susan K. Brown, Benilde Garc a Cabrero, Cynthia Garc a Coll, Regina Cortina, Ivania de la Cruz, Guadalupe Ruiz Cu llar, Claudia Galindo, Francisco X. Gayt n, Edmund T. Hamann, Nadia Huq, Mark A. Leach, Gabriela Livas Stein, Carmina Makar, Mary Martinez-Wenzl, Vilma Ort z, Mar a Guadalupe P rez Mart nez, Leslie Reese, Rosaura Tafoya-Estrada, Edward Telles, Ernesto Trevi o, V ctor Z iga "This volume is one of a kind. . . . It represents a first step in what we hope will be an ongoing relationship between the institutions and the researchers on both sides of the border who have both an appreciation for the importance of this work and a dedication to improving the educational opportunities of those students that we share in time, space, and culture." —From the Foreword by Patricia G ndara and Eugene Garc a "A fresh, eye-opening array of essays that highlights how the economic and cultural vitality of the U.S. and Mexico is so tightly interwoven in colorful and breathtaking ways. Setting aside strident allegations of how immigrants differ from mainstream society, the authors illustrate our commonalities, how Mexican parents are among the most pro-family, hardest working families in our society. 'Bien educado' is not just metaphor: it animates how immigrant parents raise engaged children, along with a vibrant optimism about getting into America." —Bruce Fuller, Professor, Education & Public Policy, University of California, Berkeley "Regarding Educaci n is an extraordinary achievement. World-class scholars from both the U.S. and Mexico come together to engage one of the most important developments in education in the 21st century: How do we educate the children we share across transnational borders to thrive in an ever more interconnected, miniaturized, and fragile global world? The answers they provide are timely, riveting, and humane. It is a book every teacher, every policymaker, and every engaged citizen interested in globalization and education must read." —Marcelo M. Su rez-Orozco, Dean and Distinguished Professor of Education, UCLA Graduate School of Education and Information Studies

Louann Brizendine, M.D. 2007-08-07 Since Dr. Brizendine wrote The Female Brain ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In The Female Brain, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.
