Making the Grade William A. Fischel 2009-11-15 A significant factor for many people deciding where to live is the quality of the local school district, with superior schools creating a price premium for housing. The result is a "race to the top," as all school districts attempt to improve their performance in order to attract homebuyers. Given the importance of school districts to the daily lives of children and families, it is surprising that their evolution has not received much attention. In this provocative book, William Fischel argues that the historical development of school districts reflects Americans' desire to make their communities attractive to outsiders. The result has been a standardized, interchangeable system of education not overly demanding for either students or teachers, one that involved parents and local voters in its governance and finance. Innovative in its focus on bottom-up processes generated by individual behaviors rather than top-down decisions by bureaucrats, *Making the Grade* provides a new perspective on education reform that emphasizes how public schools form the basis for the localized social capital in American towns and cities.

Communicating Risks and Benefits Baruch Fischhoff 2012-03-08 Effective risk communication is essential to the well-being of any organization and those people who depend on it. Ineffective communication can cost lives, money and reputations. *Communicating Risks and Benefits: An Evidence-Based User's Guide* provides the scientific foundations for effective communications. The book authoritatively summarizes the relevant research, draws out its implications for communication design, and provides practical ways to evaluate and improve communications for any decision involving risks and benefits. Topics include the communication of quantitative information and warnings, the roles of emotion and the news media, the effects of age and literacy, and tests of how well communications meet the organization's goals. The guide will help users in any organization, with any budget, to make the science of their communications as sound as the science that they are communicating.

Political Handbook of the World 2018-2019 Tom Lansford 2019-03-19 The Political Handbook of the World provides timely, thorough, and accurate political information, with more in-depth coverage of current political controversies than any other reference guide. The updated 2018-2019 edition will continue to be the most authoritative source for finding complete facts and analysis on each country's governmental and political makeup. Compiling in one place more than 200

entries on countries and territories throughout the world, this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system. It also provides names of key ambassadors and international memberships of each country, plus detailed profiles of more than 30 intergovernmental organizations and UN agencies. This comprehensive update will include coverage of current events, issues, crises, and controversies from the course of the last two years, including: Elections across Europe Referendum in Ireland Rohingya genocide in Myanmar The Venezuelan dictatorship The renaming of Swaziland to eSwatini Qatar diplomacy changes Historic meeting between the United States and North Korea Establishment of a new governing coalition in Liberia

Transportation Planning Handbook ITE (Institute of Transportation Engineers) 2016-07-11 A multi-disciplinary approach to transportation planning fundamentals The *Transportation Planning Handbook* is a comprehensive, practice-oriented reference that presents the fundamental concepts of transportation planning alongside proven techniques. This new fourth edition is more strongly focused on serving the needs of all users, the role of safety in the planning process, and transportation planning in the context of societal concerns, including the development of more sustainable transportation solutions. The content structure has been redesigned with a new format that promotes a more functionally driven multimodal approach to planning, design, and implementation, including guidance toward the latest tools and technology. The material has been updated to reflect the latest changes to major transportation resources such as the HCM, MUTCD, HSM, and more, including the most current ADA accessibility regulations. Transportation planning has historically followed the rational planning model of defining objectives, identifying problems, generating and evaluating alternatives, and developing plans. Planners are increasingly expected to adopt a more multi-disciplinary approach, especially in light of the rising importance of sustainability and environmental concerns. This book presents the fundamentals of transportation planning in a multidisciplinary context, giving readers a practical reference for day-to-day answers. Serve the needs of all users Incorporate safety into the planning process Examine the latest transportation planning software packages Get up to date on the latest standards, recommendations, and codes Developed by The Institute of Transportation Engineers, this book is the culmination of over seventy years of transportation planning solutions, fully updated to reflect the needs of a changing society. For a comprehensive guide with practical answers, The *Transportation Planning Handbook* is an essential reference.

Detroit's Michigan Central Station Kelli B. Kavanaugh 2001 In 1913, the Michigan Central Station opened its majestic entrances to the people of Detroit. Designed by Warren & Wetmore and Reed & Stern, the firms also noted as the architects of the Grand Central Station in New York City, the depot was a marvel of grandeur and comfort for the traveler lucky enough to utilize its facilities. Soldiers went to war, families both separated and rejoined, and folks looking for an honest living in the Motor City all walked the Michigan Central's elegant corridors. Since the last train pulled away from the station in 1988, the structure has fallen prey to rapidly paced deterioration. Detroit's Michigan Central Station captures the glory of the Michigan Central and its environs. Using photographs from the Burton Historical Collection, as well as private collections, the book illustrates the use of the Michigan Central Station by a city whose story dramatically parallels that of this magnificent structure. The book also includes imagined futures of the station from some of the many people who have been inspired by the magic this grand building continues to exude.

The Automotive Industry and European Integration A. J. Jacobs 2019-08-07 This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because

fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Digital Jihad Erik Skare 2016-10-15 A new and innovative form of dissent has emerged in response to the Israeli occupation of Palestine. Dubbed "electronic jihad", this approach has seen organized groups of Palestinian hackers make international headlines by breaching the security of such sites as the Tel Aviv Stock Exchange, AVG, Avira, Whatsapp, and BitDefender. Though initially confined to small clandestine groups, "hacktivism" is now increasingly being adopted by militant Palestinian parties, including Hamas and Palestinian Islamic Jihad, who have gone so far as to incorporate hackers into their armed brigades. *Digital Jihad* is the first book to explore this rapidly evolving and still little understood aspect of the Palestinian resistance movement. Drawing on extensive interviews with hackers and other activists, it provides a unique and fascinating new perspective on the Palestinian struggle.

Prosecutor's Manual for Arrest, Search and Seizure 3rd Edition John M. Castellano 2021-10-15 The ideal roadmap for defense lawyers and prosecutors, John M. Castellano has built on the fine works of the original authors of this book, James A. Adams and Daniel D. Blinks who appreciate the succinct analysis necessary to canvass the often tangled landscape of Fourth Amendment law. Their pragmatic approach has created a balanced, sound and comprehensive one-volume survey of arrest, search and seizure issues. The Third edition now features all decisions by the Supreme Court Fourth Amendment cases through June 2015 as well as significant and helpful circuit court decisions on a variety of topics. It includes a number of other new, expanded, or refined sections as well which include application for orders to intercept; bodily intrusions, emergency searches, and workplace searches. The eBook versions of this title feature links to Lexis Advance for further legal research options.

Regarding Educacion Bryant Jensen 2012 The "Latino Education Crisis" not only threatens to dash the middle class aspirations of the nation's largest immigrant group, it is also an ominous sign for democratic engagement and global competitiveness for U.S. society as a whole. This timely book argues that this crisis is more aptly characterized as a "Mexican Education Crisis." This book brings together voices that are rarely heard on the same stage—Mexican and U.S. scholars of migration, schooling, and human development—to articulate a new approach to Mexican-American schooling: a bi-national focus that highlights the interpersonal assets of Mexican-origin children. Contributors document the urgency of adopting this approach and provide a framework for crossing national and disciplinary borders to improve scholarship, policy, and practice associated with PreK–12 schooling. Contributors: James D. Bachmeier, Frank D. Bean, Susan K. Brown, Benilde García Cabrero, Cynthia García Coll, Regina Cortina, Ivania de la Cruz, Guadalupe Ruiz Cuéllar, Claudia Galindo, Francisco X. Gaytán, Edmund T. Hamann, Nadia Huq, Mark A. Leach, Gabriela Livas Stein, Carmina Makar, Mary Martinez-Wenzl, Vilma Ortíz, María Guadalupe Pérez Martínez, Leslie Reese, Rosaura Tafoya-Estrada, Edward Telles, Ernesto Treviño, Víctor Zúñiga "This volume is one of a kind. . . . It represents a first step in what we hope will be an ongoing

relationship between the institutions and the researchers on both sides of the border who have both an appreciation for the importance of this work and a dedication to improving the educational opportunities of those students that we share in time, space, and culture.” –From the Foreword by Patricia Gándara and Eugene García “A fresh, eye-opening array of essays that highlights how the economic and cultural vitality of the U.S. and Mexico is so tightly interwoven in colorful and breathtaking ways. Setting aside strident allegations of how immigrants differ from mainstream society, the authors illustrate our commonalities, how Mexican parents are among the most pro-family, hardest working families in our society. ‘Bien educado’ is not just metaphor: it animates how immigrant parents raise engaged children, along with a vibrant optimism about getting into America.” –Bruce Fuller, Professor, Education & Public Policy, University of California, Berkeley “Regarding Educación is an extraordinary achievement. World-class scholars from both the U.S. and Mexico come together to engage one of the most important developments in education in the 21st century: How do we educate the children we share across transnational borders to thrive in an ever more interconnected, miniaturized, and fragile global world? The answers they provide are timely, riveting, and humane. It is a book every teacher, every policymaker, and every engaged citizen interested in globalization and education must read.” –Marcelo M. Suárez-Orozco, Dean and Distinguished Professor of Education, UCLA Graduate School of Education and Information Studies

Zero Carbon Car Brian Long 2013-03-01 The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation. Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in environmentally friendly engine technology; Electric cars; Environmental issues in material usage and car body manufacture. A wide-ranging survey of the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint. Written in an easy-to-understand manner, the book enables the reader to fully understand what is meant by 'global warming'. Examines alternative fuels, material usage and the motive power options available to us. Superbly illustrated with 350 colour photographs. Brian Long is a professional writer and motoring historian with over sixty books to his credit.

The Female Brain Louann Brizendine, M.D. 2007-08-07 Since Dr. Brizendine wrote *The Female Brain* ten years ago, the response has been overwhelming. This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

Glocalized Solutions for Sustainability in Manufacturing Jürgen Hesselbach
2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing and end-of-life-management. The theme "Glocalized Solutions for Sustainability in Manufacturing" addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services and processes taking into account local capabilities and constraints to achieve an economically, socially and environmentally sustainable society in a global perspective. Glocalized Solutions for Sustainability in Manufacturing do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local capabilities as well as local constraints have to be drivers for product- and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering (LCE) 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas.

Foundations of Computational Intelligence Ajith Abraham 2009-05-01 *Foundations of Computational Intelligence Volume 6: Data Mining: Theoretical Foundations and Applications* Finding information hidden in data is as theoretically difficult as it is practically important. With the objective of discovering unknown patterns from data, the methodologies of data mining were derived from statistics, machine learning, and artificial intelligence, and are being used successfully in application areas such as bioinformatics, business, health care, banking, retail, and many others. Advanced representation schemes and computational intelligence techniques such as rough sets, neural networks; decision trees; fuzzy logic; evolutionary algorithms; artificial immune systems; swarm intelligence; reinforcement learning, association rule mining, Web intelligence paradigms etc. have proved valuable when they are applied to Data Mining problems. Computational tools or solutions based on intelligent systems are being used with great success in Data Mining applications. It is also observed that strong scientific advances have been made when issues from different research areas are integrated. This Volume comprises of 15 chapters including an overview chapter providing an up-to-date and state-of-the research on the applications of Computational Intelligence techniques for Data Mining. The book is divided into 3 parts: Part-I: Data Click Streams and Temporal Data Mining Part-II: Text and Rule Mining Part-III: Applications Part I on Data Click Streams and Temporal Data Mining contains four chapters that describe several approaches in Data Click Streams and Temporal Data Mining.
