parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

New Directions in Assessing Historical Thinking Kadriye Ercikan 2015-02-20 New technologies have radically transformed our relationship to information in general and to bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of historical education and assessment forward. Their various approaches negotiate the sometimes-conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students’ language literacy on history assessments, and methods of validation in both large scale and classroom assessments. New Directions in Assessing Historical Thinking is a critical, research-oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

Color Correction Handbook Alexis Van Hurkman 2014 The ‘Color Correction Handbook’ covers a wide variety of techniques that can be used by colourists, no matter what system they’re using. The Perfect Summer Morgan Billingsley 2015 The talented trio that brought you The Perfect Present is back...with summer stories that will brighten your day, warm your heart, and prove that life is one of the greatest teachers there is. In Too Big for Teacups, Gabrielle Simone introduces us to the Fernandez family, who is on their way to Disney for a vacation. Marlena, the oldest, would rather stay home and practice with her dance team. But her parents make her go, and Marlena trudges through a miserable week of what was supposed to be a family bonding experience. In the midst of her complaining, her best friend, Jennifer, helps her learn a valuable life lesson and a new outlook on family time. In Jackie Lee’s A Lesson for Summer, 14-year-old twins, Vanessa and Teresa, had planned their ideal summer vacation. But when their father announces that he’s taking over a new church in a new city, the girls find their summer ruined! Instead of spending their days shopping, talking about boys, and going to the movies, they were going to be moving and volunteering to mentor a bunch of snotty-nosed seven-year-olds. The twins do everything in their power to sabotage their parents’ plans for them. However, in the end, they learn life lessons that truly make this the perfect summer for both of them. Morgan Billingsley is back with twins, Max and Mickey in A Country Summer. And this time, the suburban duo is unplugging from their iPads, Wi-Fi, and Netflix, to spend the summer with their extended family in a small Arkansas town. This was not at all Mickey’s idea of fun. In fact, she hates the boring country and her “classless” relatives. While Max fits right in with his cousins, Mickey soon feels left out and learns a valuable lesson about life - it doesn’t matter what you have...what matters is who you have. These three young writers will inspire and entertain...and leave you with a lesson or two yourself.

Manuel de hidráulica Azevedo Netto 2018-03-07 Este livro é voltado aos profissionais e estudantes de Engenharia e permanece indispensável à biblioteca mínima dos técnicos do setor, procurando atender também àqueles que, embora não especialistas, precisem interagir com essa especialidade. Desenvolve conceitos e princípios básicos necessários ao entendimento da teoria e compreensão dos fenômenos. Também apresenta comentários, aplicações práticas, dados técnicos e exemplos de dimensionamentos e projetos de unidades e sistemas em que a água está presente, seja como técnica predominante, seja como coadjuvante: estruturas hidráulicas, tubulações, canais, bombeamentos, turbinas, unidades de tratamento, redes de distribuição de água e de coleta de esgotos, reservatórios, instalações prediais, irrigação, drenagem pluvial, medições e acessórios frequentes. Apresenta parâmetros que permitem desenvolver anteprojetos ao citar Normas Técnicas adotadas pelas entidades normalizadoras, e ao sugerir valores consagrados pela prática usual e pela experiência do autor. Esta 9a edição, preparada pelo engenheiro Miguel Fernández y Fernández, escolhido pelo Prof. Azevedo Netto para esse fim, mantém muito das edições anteriores, mas apresenta reorganizações, modificações, acréscimos, informações e atualizações significativas.

The Origins Solution Dick Fischer 1996 This book is creating a firestorm of academic debate. Fischer proposes that Adam was created under a covenant with God and was inserted into an already populated world. His harmonization of Genesis with history and science puts this issue to rest.
