Researching Newsreels Clara Chambers 2018-09-14 This volume addresses the understanding of the new medium of newsreel films, usually accompanied by explanatory intertitles or voiceovers, were a central part of the filmgoing experience around the world from 1910 through the late 1960s, and in many cases even later. As the only source of moving image news available before the widespread advent of television, newsreels are important social documents, recording what the general public was told and shown about the events and personalities of the day. Often disregarded as quirky or trivial, they were heavily utilised as propaganda vehicles, offering insights into the socio-political norms reflected in cinema during the first half of the twentieth century. The book presents a range of current research being undertaken in newsreel studies internationally and makes a case for a reconsideration of the importance of newsreels in the wider landscape of film history.

The VW Camper Van Mike Harding 2013-05-23 It was invented immediately after the war, in the factory a far-sighted English military man had set up to turn the German economy from making machines of warfare to more pacific products. By the seventies that dream had been amply fulfilled, as the VW Campervan became the conveyance of choice for West Coast hippies, Australian surf bums and Europeans taking the overland route to find enlightenment and good karma in India. It had also become more than a vehicle – it had truly become a way of life. Mike Harding's first ride in a Volkswagen Camper Van was back in 1961, when it was the carrying around the gear and bandmembers of his rock band the Manchester Rainmakers. Finally, in 2009, he could wait no longer, and bought his own, a 2001 Type 2 bay window Brazilian import Danbury conversion in hot orange and off white. Add in the endless curiosity of the author of eight monographs on church architecture, and the hilarious sense of humour of one of Britain's best stand-up comics, and you have a wonderful social history of the postwar years through the prism of a single transport icon.

Volkswagen Model Documentation Joachim Kuch 1999 The idea of building a car for the people was not new, but the success of such models had always been limited. At least until 1946, when the Volkswagen factory began building the first Beetles for public consumption. From then on the car just ran and ran. Volkswagen Model Documentation begins by telling the history of Volkswagen after the war, how the British under Major Ivan Hirst rescued Porsche's concept from the rubble, and how Heinrich Nordhoff then steered the company to worldwide success. Joachim Kuch then examines in detail the genesis and history of each Volkswagen model, beginning with the Beetle and Cabriolet (Types 1 and 151), through the Karmann-Ghia (Type 14), Thing (Type 181) Transporter (Type 2, including air-and watercooled, Campmobile and Westfalia), Type 3 (Notchback, Squareback, Fastback, Ghia), Type 4 (411, 412), and 914 (4-and 6-cylinder). Also included are separate sections detailing the important dates, changes, and milestones in each model's production run. Packed with photographs, quotes from press and test articles of the time, and information from internal Volkswagen documents, Volkswagen Model Documentation tells the comprehensive story of all the Volkswagen boxer-engine models.

VW Beetle and Microbus Vincent Molenaar 2013-07-01 This comprehensive guide is the first one to tell the whole story of the Volkswagen Bay-Window Transporter, produced from 1967 - 1979. This new, paperback edition deals with the Transporter's development, its technical evolution, the model codes, the specification detail changes, the factory fitted M-codes and Transporter export. Using this book, bus enthusiasts can crack the codes of their own specific vehicle, to find out the factory-fitted specifications - like paint and trim colors, engine and transmission types, and even, the date of manufacture, model and destination code.

How to Hot Rod Volkswagen Engines
Richard Copping 2011-10-20
The Volkswagen Transporter is one of the best-loved and most recognisable motor vehicles of all time. The preferred transport for surfers and hippies everywhere, the Volkswagen Type 2 ‘bus’ has been around since the Second World War. The ancestor of today’s people carrier. Available in various versions, including panel, van, pick-up and minibus, Transporters were often converted into campervans for a newly motorised class of holidaymaker. This book looks at the development, production and use of the class first, and second, generation Transporter. With archive illustrations including photographs from old brochures this book is also a great evocation of the 1950s and 60s. How to convert Volkswagen T5 Van to Camper Lindsay Porter 2007-11-20

Volkswagen Richard Copping 2005-12-24 The original air-cooled Volkswagen Cars and Transporters were all incredibly popular 1960s design classics with enduring appeal. They are explored in this fascinating book, a unique pictorial chronicle of the Volkswagen story in the fifties and sixties. The author makes extensive use of the artwork from contemporary promotional literature and rare promotional material, giving the book a real period feel. Patina Volkswagens Mark Walker 2022-01-07 Since the early 2000s, the apparent explosion of interest in Volkswagens with original paint, rust and patina has inspired a generation of car fanatics, who might not be able to afford to restore a car to show condition, but still want a good looking, cool car that will stand out from the crowd. Once looked upon as being in need of restoration, cars with original paint, rust and patina, especially within the global Volkswagen community, have gradually become far more popular than restored cars. When walking down a line of cars at a car show, it's easy to see why; these cars are rare, unspoiled survivors - cars that tell a story of an interesting and varied past. The look of the Volkswagen being built in this style is so honest, unspoiled and characterful, that it has begun to inspire the media; even Hollywood movie stars and celebrities. Whilst this has undoubtedly resulted in increased car values, and turned a brand of cars that had always been a cheap, honest mode of transportation into something cool with a high price tag, the generation it initially inspired has grown with the hobby, and produced a micro-industry that still manages to embrace the 'Built not bought' ethos. This book, superbly illustrated with stunning colour photographs, takes an inside look at some of the key car builders, dealers, celebrities and hobbyists, as well as the different styles of build, revealing every single feature that makes a style all its own. Foreword by Drew Pritchard of TV's 'Salvage Hunters' fame.
