pampered boy, Obuechina Maduabuchi.....Only brother of five older sisters and a younger one, prize pupil in school, apple of his doting mother’s eye, eight years old and hopelessly spoilt. In a vain attempt to salvage his character, his father decides he must be sent away as houseboy to a teacher and his wicked wife.

**Discussion and Lecture Method in Chemistry** Abubakar Nyamida 2020-07-22 Research Paper (undergraduate) from the year 2020 in the subject Didactics - Chemistry, grade: 3.5, University of Jos, language: English, abstract: The main purpose of this study is to examine the effects of discussion and lecture method on senior secondary two students’ performance and interest in chemistry in Jos North, Nigeria. Specifically, the study sets out to determine the effects of discussion and lecture methods on academic achievements in chemistry and on academic achievement of male and female students who are taught chemistry. Teaching and learning are important parts of the process of education which contribute to the development of learners’ understanding and skills with which to become useful citizens in society. Education involves the total efforts of the community to raise its political, social and economic standard of living. The implication of this is the development of a nation which depends on largely the level of its scientific and technological literacy. Thus, the importance of chemistry as a subject cannot be underrated especially in Nigeria where the national income rests on petroleum and petrochemical industries.

**Women of Owg** Femi Osofsan 2006 This is an African retelling of Euripides: an unsparingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

**Modern Approach To Chemical Calculations An Introduction To The Mole Concept** Ramendra C Mukerjee 2004

Public Examinations Examined Thomas Kellyghan 2019-11-19 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book’s primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. “This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as “the diploma disease?” takes hold with an ever-greater intensity at every level of education, the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog.?” Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors’ remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.”? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong, and former Director, UNESCO International Institute for Educational Planning “I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.?” Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

**Scent and Chemistry** Günther Ohloff 2012-01-10 This book is the long awaited completely revised and extended edition of Günther Ohloff’s standard work “Scent and Fragrances: The Fascination of Odors and Their Chemical Perspectives”. The prominent chemists Günther Ohloff, Wilhelm Pickenhagen, and Philip Kraft convey the scientist, the perfumer, as well as the interested layman with a vivid and up-to-date picture of the state of the art of the chemistry of odors and the research in odor perception. The book details on the molecular basis of olfaction, olfactory characterization of perfumery materials, structure-odor relationships, the chemical synthesis of odors, and the chemistry of essential oils and odors from the animal kingdom, backed up by ca. 400 perfumery examples and historical aspects. It will serve as a through introductory text for the development of learners’ understanding of odors, their synthesis, natural occurrence and their structure?odor correlation demonstrate what a fascinating science is.

**Teaching Thinking Skills** Joan Boykoff Baron 1987 This book presents essays by ten eminent psychologists, educators, and philosophers that unite classical and modern theories of thought with the latest practical approaches to the learning and teaching of thinking skills.

**Unexpected Joy at Dawn** Alex Ameh Agiyyiri 2003 Fifteen years ago, Mama said, starting her story, I came to Lagos from Ghana. I came to Nigeria because I was considered an alien in that country. The government of Ghana passed a law asking all aliens without resident permits to regularize their stay in the country. This story of migration, identities and lives undermined by cynical and xenophobic politics pushed to its logical and terrible conclusion pertains to the Ghanaian orders of ‘alien compliance’ issued in 1970-1971, which determined to force all non-Ghanaians, so called illegal immigrants, to return to their - so stipulated - ‘home’. The novel thus touches on concerns of deeper relevance to the politics of race and migration of the twenty-first century. The Sinister Trophy John Kiriamiti 1999 Written by the author of the popular Son of Fate, this follow-up story tells of Adams Wamathina, better known as Son of Fate, who is searching for a trophy which other parties will stop at nothing to get. The action takes place in Nairobi and Tanzania and Son of Fate finds himself involved with car chases and murder as he becomes embroiled in the chase.

**Effective Teaching in Higher Education** Madeleine Atkin 2002-09-11 Assists academic staff to develop their effectiveness as teachers and improve their students’ learning by giving practical guidelines and suggestions for teaching and a series of activities.

**Additional Mathematics: Pure and Applied** J. F. Talbert 1995 This sixth edition of Additional Mathematics: Pure and Applied, has been completely revised and updated.

**Factors contributing to academic performance of students in a Junior High School** Anthony Abaidoo 2018-11-22 Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade: 5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students’ academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High School (JHS) in a Basic School which is in the Como-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average score of 31.48%) and English Language (average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM’s, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children's academics and providing them their academic needs. School factors that were significant included availability of text books and TLM’s. The study also found that parent level of education and gender has a positive relationship with academic performance of JHS students in the Basic School.

performance but it’s insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

Validating Technological Innovation David Coniam 2016-04-02 This book discusses Hong Kong’s use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Teaching Secondary School Mathematics: Techniques And Enrichment Alfred S Posamentier 2020-09-18 The primary aim of this book is to provide teachers of mathematics with all the tools they would need to conduct most effective mathematics instruction. The book guides teachers through the all-important planning process, which includes short and long-term planning as well as constructing most effective lessons, with an emphasis on motivation, classroom management, emphasizing problem-solving techniques, assessment, enriching instruction for students at all levels, and introducing relevant extracurricular mathematics activities. Technology applications are woven throughout the text. A unique feature of this book is the second half, which provides 125 highly motivating enrichment units for all levels of secondary school mathematics. Many years of proven success makes this book essential for both pre-service and in-service mathematics teachers.

A New Certificate Chemistry Albert Holderness 1986

Man Out Andrew L. Yarrow 2018-09-11 The story of men who are hurting—and living on the outskirts of twenty-first century America. These men are disconnected from work, personal relationships, family and children, and civic and community life. They may be angry at government, employers, women, and “the system” in general—and millions of them have done time in prison and have cast aside many social norms. Sadly, too many of these men are unsure what it means to be a man in contemporary society. Wives or partners reject them; children are estranged from them; and family, friends, and neighbors are embarrassed by them. Many have disappeared into a netherworld of drugs, alcohol, poor health, loneliness, misogyny, economic insecurity, online gaming, pornography, other off-the-grid corners of the internet, and a fantasy world of starting other off-the-grid corners of the internet, and a fantasy world of starting something or even writing the Great American novel. Most of the men described in this book are poorly educated, with low incomes and no prospects for rewarding employment. They are also disproportionately found among millennials, those over 50, and African American men. Increasingly, however, these lost men are discovered even in tony suburbs and throughout the nation. It is a myth that men on the outer corners of society are only lower-middle-class white men dislocated by technology and globalization. Unlike those who primarily blame an unjust economy, government policies, or a culture sanctioning “laziness,” Man Out explores the complex interplay between economics and culture. It rejects the politically charged dichotomy of seeing such men as either victims or culprits. These men are hurting, and in turn they are hurting families and hurting America. It is essential to address their needs through a mix of strategies to provide support, guidance, and resources to help these men re-engage with society.

Harvest of Corruption
Training Complex Cognitive Skills (Grade 12) examination results in particular can be made. This book is a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level not, then how can it be improved? The aim of this book is to provide a comprehensive guide offers advice on the types of surgery on offer and highlights the many diets that are required prior to surgery. Its main focus is on advice and recipes for after surgery to help the post-op patient maximise their best chance of long-term success with weight-loss and better health.

Educational Assessment in a Time of Reform Coert Loock 2019-11-20 Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough. If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.

Training Complex Cognitive Skills Jeroen J. G. van Merriënboer 1997 Harvest of Corruption Frank Ogodo Ogbeche 2005 Faceless Anna Darko 2003 Street life in the slums of Accra is realistically portrayed in this socially-committed, subtle novel about four educated women who are inspired by the plight of a 14-year old girl, Fofu. As the main characters convert their library center into a practical street initiative, the novel invokes the squalor, health risks, and vicious cycles of poverty and violence that drive children to the streets and women to prostitution; and, from which, ultimately, no one in the society is free.
