Slave Stealers Timothy Ballard 2018-09-04 Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Man Out Andrew L. Yarrow 2018-09-11 The story of men who are hurting—and hurting America by their absence Man Out describes the millions of men on the sidelines of life in the United States. Many of them have been pushed out of the mainstream because of an economy and society where the odds are stacked against them; others have chosen to be on the outskirts of twenty-first-century America. These men are disconnected from work, personal relationships, family and children, and civic and community life. They may be angry at government, employers, women, and "the system" in general—and millions of them have done time in prison and have cast aside many social norms. Sadly, too many of these men are unsure what it means to be a man in contemporary society. Wives or partners reject them; children are estranged from them; and family, friends, and neighbors are embarrassed by them. Many have disappeared into a netherworld of drugs, alcohol, poor health, loneliness, misogyny, economic insecurity, online gaming, pornography, other off-the-grid corners of the internet, and a fantasy world of starting their own business or even writing the Great American novel. Most of the men described in this book are poorly educated, with low incomes and often with very few prospects for rewarding employment. They are also disproportionately found among millennials, those over 50, and African American men. Increasingly, however, these lost men are discovered even in tony suburbs and throughout the nation. It is a myth that men on the outer corners of society are only lower-middle-class white men dislocated by technology and globalization. Unlike those who primarily blame an unjust economy, government policies, or a culture sanctioning "laziness," Man Out explores the complex interplay between economics and culture. It rejects the politically charged dichotomy of seeing such men as either victims or culprits. These men are hurting, and in turn they are hurting families and hurting America. It is essential to address their problems. Man Out draws on a wide range of data and existing research as well as interviews with several hundred men, women, and a wide variety of economists and other social scientists, social service providers and physicians, and with employers, through a national online survey and in-depth fieldwork in several communities.

The Book of L G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been called L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L. Indeed, hundreds of researchers have followed this suggestion. Some of them appear as

contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.
