The West African Examinations Council (1962-2002) Gle, a chief priest, abandons his role as custodian and defender of age-old customs to fight voluntarily on the side of the British in the Second World War. When the war ends, Gle and his fellow African soldiers do not receive their promised rewards. They return home to find their villages under attack and their traditional ways being repressed. Politicised by their role in the foreign conflicts they join together and march in protest to present a petition to the Governor of the Gold Coast (now Ghana), in an act of self-determination. The colonial forces respond with fire, soldiers are shot dead. The angry protestors decamp to the slums of Accra and loot the shops, in what became the famous looting of 28 February 1948, and would mark the beginning of Ghana’s fight for independence from Britain.

Paranthood Dalton Conley 2014-03-18 An award-winning scientist offers his unique and unorthodox approach to childrearing: “Parenthood is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on the well-worn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Paranthood, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improve educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to do experiments on the latest research, to engage with their kids in ways that will produce solid and happy ones. Ultimately these experiments are very funny, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Paranthood teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Harvest of Corruption Frank Ogode Ogoche 2005 The book is a vivid account of the corruption that had been gripping the country under Obasanjo’s regime. Its main theme is the country’s history of myopia, the subject is that the Nigerian state has always been characterized by an endless cycle of ravenous and predatory state agents who are not only a perpetual nuisance to the Nigerian people but also a bane to the growth and development of the country.

Weird But True 10 National Geographic Kids 2018 Collects 350 quirky and fun facts about a variety of topics, such as animals, science, and food. Rath and Storm Peter Archer 2018-03-27 Gerrard’s Legacy A collection of powerful magical artifacts is the only defense against the forces of evil that are arrayed against Dominaria. Gerrard, the heir to the Legacy, together with Siggy, captain of the flying ship Weatherlight, has sought out many parts of the world in search of artifacts that would allow them to defeat the enemy. The legacies of their engagement with kids will produce solid and happy ones. Ultimately these experiments are very funny, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Paranthood teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Weedopedia Michael Anthony 2018-09-09 The two books, Oral English 1 and Oral English 2, are unique publications in the field of spoken English for English learners at the college or similar level. They're unique in three important ways. First, the books treat all the popular topics, thirty in total, from fun topics like sports to serious topics like politics. Each topic is covered in an unorthodox and thoroughly comprehensible way, using various approaches ranging from key words to games. Second, the books can be used as class textbooks, in which case they have more than enough material for a whole academic year. They can also be used for self-study and as reference books. Third, the books are very user-friendly. They provide clear, concise, and useful illustrations, and provide hints and answers to questions. The two books are the result of more than a decade of research and teaching oral English to native-

denonative speakers. Readers will find the books not only educational, but also very informative and quite entertaining. Tales from the Arabian Nights 2008 12 ages 6+ over. A collection of stories from Rumi’s classic opus The Mathnawi, this astounding compilation of

Over 24,000 verses is carefully adapted for younger audiences. Best known for his spiritual poetry and the foundation of Sufi practice he inspired, Rumi’s influence continues to spread around the world.

**The Book of** L. G. Rozenberg 2012-12-06 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been used to model a series of biological phenomena. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) influences most fruitful ideas in other areas (theory of formal languages and combinatorial theory). As evident from the articles and references in this book, the influence on L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for block states, "1" for cell states, and "0" for rules that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "O" rather than "0", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DOL indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose contributions have influenced the theory of L systems has been most significant.

Mordin on Time
Nick Mordin 2003-02
In Mordin On Time, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). Mordin On Time enables the reader to construct their own speed ratings wherever they live.
