Consumer driven design for a global, supply chain perspective of operations management — a treatment that embraces the foundations of operations management but includes new frameworks, concepts, and tools to address the demands of today and changing needs of the future. It reflects over three key shifts in operations management research: (1) an internal systemic focus to a focus on the supply chain, (2). From a local focus to a global focus, and (3) an emphasis on improving the lives of consumers and people, and processes.
