How to Get Into Medical School in Australia
Timothy Shiraev 2013-06 ‘How to Get into Medical School in Australia’ is the definitive guide on how to succeed in your application to medical school - and how to excel once there. The book provides comprehensive details of the admissions processes – both undergraduate and graduate – in an easy-to-digest, chronological format, to help you manage your application step by step. This detailed handbook includes an overview of the admissions process and the career of a doctor, characteristics sought in potential medical students and how to optimise them, study techniques for high school and undergraduate students, information on how to prepare for the medical school entry exams (UMAT and GAMSAT), the pros and cons of undergraduate and postgraduate medical school, and timelines on when to begin preparing for each step of the application process. The guide also features advice on special applications (for mature age, indigenous, rural and international students), non-traditional routes of entry, how to optimise your medical school application form (including sample resumés), and the all-important medical school interview – including how to prepare, how to dress and how to answer questions successfully on the day, as well as several pages of practice interview questions. Once you have succeeded in gaining admission, the book also offers information on what medical school is like, and advice on how to excel and enjoy it (including a list of necessary textbooks). Additionally, the guide includes advice from people who have excelled in various parts of the process: those who aced their high school leaver’s exams, medical students, and junior and
senior doctors. They describe their experiences and, most importantly, provide tips and guidance on how to succeed in getting into and studying at medical school. Also included are the profiles of every medical school in Australia, detailing entry requirements, contact details, fees, numbers of places for students and the focus and academic ranking of each individual school. The Success Equation Michael J. Mauboussin 2012-10-16 “Much of what we experience in life results from a combination of skill and luck.” — From the Introduction The trick, of course, is figuring out just how many of our successes (and failures) can be attributed to each—and how we can learn to tell the difference ahead of time. In most domains of life, skill and luck seem hopelessly entangled. Different levels of skill and varying degrees of good and bad luck are the realities that shape our lives—yet few of us are adept at accurately distinguishing between the two. Imagine what we could accomplish if we were able to tease out these two threads, examine them, and use the resulting knowledge to make better decisions. In this provocative book, Michael Mauboussin helps to untangle these intricate strands to offer the structure needed to analyze the relative importance of skill and luck. He offers concrete suggestions for making these insights work to your advantage. Once we understand the extent to which skill and luck contribute to our achievements, we can learn to deal with them in making decisions. The Success Equation helps us move toward this goal by: • Establishing a foundation so we better understand skill and luck, and can pinpoint where each is most relevant • Helping us develop the analytical tools necessary to understand skill and luck • Offering concrete
suggestions about how to take these findings and put them to work. Showcasing Mauboussin’s trademark wit, insight, and analytical genius, The Success Equation is a must-read for anyone seeking to make better decisions—in business and in life.

**The Dot** Peter H. Reynolds 2013-09-10

Features an audio read-along! With a simple, witty story and free-spirited illustrations, Peter H. Reynolds entices even the stubbornly uncreative among us to make a mark -- and follow where it takes us. Her teacher smiled. "Just make a mark and see where it takes you." Art class is over, but Vashti is sitting glued to her chair in front of a blank piece of paper. The words of her teacher are a gentle invitation to express herself. But Vashti can’t draw - she’s no artist. To prove her point, Vashti jabs at a blank sheet of paper to make an unremarkable and angry mark. "There!" she says. That one little dot marks the beginning of Vashti’s journey of surprise and self-discovery. That special moment is the core of Peter H. Reynolds’s delicate fable about the creative spirit in all of us.

**The Fiftieth Gate** Mark Raphael Baker 2017-07-03

What right did I possess, as a child of survivors, to recreate an account of the Holocaust as if I was there? In writing The Fiftieth Gate, Mark Baker describes a journey from despair and death towards hope and life; it is the story of a son who enters his parents’ memories and, inside the darkness, finds light. In his evocative prose, Baker takes us to this place of horror, and then brings us back to reflect on these events and remember: ‘Never again’. Across the silence of fifty years, Baker and his family travel from Poland and Germany to Jerusalem and...
Melbourne, as the author struggles to uncover the mystery of his parents’ survival: his father Yossi was imprisoned in concentration camps and his mother Genia was forced into hiding after the Jews of her village were murdered. Twenty years on from its first publication, The Fiftieth Gate remains an extraordinary book. It has become a classic and has now sold over 70,000 copies. In Baker's new introduction, he recalls his motivations for writing this important memoir, and highlights how the testimonial culture in Holocaust studies has spread to awareness of other genocides and our responsibility (and failure) to prevent them. As well as The Fiftieth Gate, A Journey Through Memory, a seminal book on his parents’ experience during the Holocaust, Mark Raphael Baker has written a compelling memoir, Thirty Days, A Journey to the End of Love, about the recent death of his wife. He is Director of the Australian Centre for Jewish Civilisation and Associate Professor of Holocaust and Genocide Studies in the School at Monash University, Melbourne. ‘Heartrending and beautiful…This simply written, subtly complex narrative is instantly recognisable as a masterpiece, and the reader is rewarded by the light it sheds.’ Age ‘Combining precise historical research and poetic eloquence, Mark Baker’s The Fiftieth Gate remains the gold standard of second generation Holocaust memoirs on the occasion of its twentieth anniversary edition.’

Christopher R. Browning

‘Baker does with memory, what Rembrandt does with light. He uses it to model, to imagine, to illuminate, to astonish.’ Philip Adams

Visible Learning for Teachers John Hattie

Learning synthesised the results of more than fifteen years research involving millions of students and represented the biggest ever collection of evidence-based research into what actually works in schools to improve learning. Visible Learning for Teachers takes the next step and brings those ground breaking concepts to a completely new audience. Written for students, pre-service and in-service teachers, it explains how to apply the principles of Visible Learning to any classroom anywhere in the world. The author offers concise and user-friendly summaries of the most successful interventions and offers practical step-by-step guidance to the successful implementation of visible learning and visible teaching in the classroom. This book: links the biggest ever research project on teaching strategies to practical classroom implementation champions both teacher and student perspectives and contains step by step guidance including lesson preparation, interpreting learning and feedback during the lesson and post lesson follow up offers checklists, exercises, case studies and best practice scenarios to assist in raising achievement includes whole school checklists and advice for school leaders on facilitating visible learning in their institution now includes additional meta-analyses bringing the total cited within the research to over 900 comprehensively covers numerous areas of learning activity including pupil motivation, curriculum, meta-cognitive strategies, behaviour, teaching strategies, and classroom management. Visible Learning for Teachers is a must read for any student or teacher who wants an evidence based answer to the question; ‘how do we maximise achievement in our schools?’

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting...
vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

Shafana and Aunt Sarrinah Alana Valentine 2010 What do you do when you profoundly disagree with someone you love? Wearing a hijab is a touchstone of religious identity, but it is also imbued with a complex array of historical and contemporary meanings. In Alana Valentine's new play, the cultural meaning of the hijab has become a wedge between generations. At the heart of Shafana and Aunt Sarrinah is the relationship between an aunt and her niece. Both devout Muslims, the younger woman wants to put on a headscarf, the older woman tries to dissuade her. For Aunt Sarrinah, the hijab represents a world from which she has escaped; for her niece, Shafana, it is a personal statement of renewed faith. Alana Valentine has written a startling meditation on the clash between individual freedom and community reaction and, as academic

*10 Mindframes for Visible Learning* John Hattie
2017-12-06 The original Visible Learning research concluded that one of the most important influencers of student achievement is how teachers think about learning and their own role. In Ten Mindframes for Visible Learning, John Hattie and Klaus Zierer define the ten behaviors or mindframes that teachers need to adopt in order to maximize student success. These include: thinking of and evaluating your impact on students’ learning; the importance of assessment and feedback for teachers; working collaboratively and the sense of community; the notion that learning needs to be challenging; engaging in dialogue and the correct balance between talking and listening; conveying the success criteria to learners; building positive relationships. These powerful mindframes, which should underpin every action in schools,
founded on the principle that teachers are evaluators, change agents, learning experts, and seekers of feedback who are constantly engaged with dialogue and challenge. This practical guide, which includes questionnaires, scenarios, checklists, and exercises, will show any school exactly how to implement Hattie’s mindframes to maximize success.

**Fall of the Roman Republic** Plutarch

2006-02-23 Dramatic artist, natural scientist and philosopher, Plutarch is widely regarded as the most significant historian of his era, writing sharp and succinct accounts of the greatest politicians and statesman of the classical period. Taken from the Lives, a series of biographies spanning the Graeco-Roman age, this collection illuminates the twilight of the old Roman Republic from 157-43 bc. Whether describing the would-be dictators Marius and Sulla, the battle between Crassus and Spartacus, the death of political idealist Crato, Julius Caesar’s harrowing triumph in Gaul or the eloquent oratory of Cicero, all offer a fascinating insight into an empire wracked by political divisions. Deeply influential on Shakespeare and many other later writers, they continue to fascinate today with their exploration of corruption, decadence and the struggle for ultimate power.

**Inside My Mother** Ali Cobby Eckermann

2015-07-01 ‘...an outstanding achievement that will, with its skill and elegance, deeply enrich Australian poetry and whoever reads it.’ Judges’ citation, 2013 NSW Premier’s Literary Award for Poetry. Ali Cobby Eckermann, a Yankunytjatjara language speaker.
poet, is at the forefront of Australian Indigenous poetry. Inside My Mother is both a political and personal collection, angry and tender, propelled by the need to remember, yet brimming with energy and vitality – qualities that distinguished her previous, prize-winning verse novel, Ruby Moonlight. Tributes to country, to her elders, and to the animals and spirits that inhabit the landscape, coupled with the rhythms of mourning and celebration that pulse through the poems, make this a moving and personal collection. Grief is deeply felt and vividly portrayed in poems such as ‘Inside My Mother’ and ‘Lament’. There is defiance and protest in ‘Clapsticks’ and ‘I Tell You True’. In the final section there is a marked generational shift as the elders begin to pass away and the poet as grandmother comes to accept her rightful place as matriarch.

**Contemporary Asian Australian Poets**
Adam Aitken 2013

This ground-breaking anthology collects poems written by Australian poets who are migrants, their children, and refugees of Asian heritage, spanning work that covers over three decades of writing. Inclusive of hitherto marginalised voices, these poems explore the hyphenated and variegated ways of being Asian Australian, and demonstrate how the different origins and traditions transplanted from Asia have generated new and different ways of being Australian. This anthology highlights the complexity of Asian Australian interactions between cultures and languages, and is a landmark in a rich, diversely-textured and evolving story. Timely and proactive this anthology fills existing cultural gaps in poetic expressions of home, travel, diaspora, identity, myth, empire and language.

**The Role of Research in Teachers' Work**
Lesley Scanlon 2018-01-29

In the debate regarding what constitutes teachers’ work, academics and bureaucrats continue to speak for teachers, with teachers’ voices rarely heard and not accorded equal recognition. The Role of Research in Teachers’ Work addresses this imbalance by privileging teachers’ voices as they narrate their experiences of engaging in systematic inquiry. The book embeds the teacher narratives within the scholarly debates about the nature of knowledge and the nature of professional practice. Scanlon examines the knowledge teachers create through their research and how that knowledge is perceived by others.
others within the school community. This book can be read as a companion volume to Scanlon’s 2015 Routledge publication My School, or as a standalone exploration of teachers’ own narratives of engaging in action research. Together, these two books are unique in contemporary writing on schools, representing one of the only comprehensive longitudinal studies of a low socioeconomic secondary school from the perspective of those who learn and teach therein. This book enables teachers to be part of the scholarly conversation about their work and the place of research in that work. As such, it should be essential reading for academics, teacher educators and postgraduates in the field of education. It should also be of interest to policymakers and teachers.
