broader community to achieve the educational goals for young Australians. This commitment will be supported by action in eight inter-related areas: (1) developing stronger partnerships; (2) supporting quality teaching and school leadership; (3) strengthening early childhood education; (4) enhancing middle years development; (5) supporting senior years of schooling and youth transitions; (6) promoting world-class curriculum and assessment; (7) improving educational outcomes for Indigenous youth and disadvantaged young Australians, especially those from low socioeconomic backgrounds; and (8) strengthening accountability and transparency. [For companion report, “MCEETYA Four-Year Plan, 2009-2012: A Companion Document for the Melbourne Declaration on Educational Goals for Young Australians,” see ED534447.]

Excel Success One HSC Biology 2019 Edit 2019-02-12

Places 2008 “Places is one of a series of four books designed specifically for lower primary students. Places utilises the personal experiences of students by investigating places closely connected to them – the home, street and neighbourhood, school and local environment.” -- Foreword.

The Dot Peter H. Reynolds 2022-05-31 With a simple, witty story and free-spirited illustrations, Peter H. Reynolds entices even the stubbornly uncreative among us to make a mark -- and follow where it takes us. Her teacher smiled. “Just make a mark and see where it takes you.” Art class is over, but Vashti is sitting glued to her chair in front of a blank piece of paper. The words of her teacher are a gentle invitation to express herself. But Vashti can’t draw -- she’s no artist. To prove her point, Vashti jabs at a blank sheet of paper to make an unremarkable and angry mark. “There!” she says. That one little dot marks the beginning of Vashti’s journey of surprise and self-discovery. That special moment is the core of Peter H. Reynolds’s delicate fable about the creative spirit in all of us.

10 Mindframes for Visible Learning John Hattie 2017-12-06 The original Visible Learning research concluded that one of the most important influencers of student achievement is how teachers think about learning and their own role in it. In Ten Mindframes for Visible Learning, John Hattie and Klaus Zierer define the ten behaviors or mindframes that teachers need to adopt in order to maximize student success. These include: thinking of and evaluating your impact on students’ learning; the importance of assessment and feedback for teachers; working collaboratively and the sense of community; the notion that learning needs to be challenging; engaging in dialogue and the correct balance between talking and listening; conveying the success criteria to learners; building positive relationships. These powerful mindframes, which should underpin every action in schools, are founded on the principle that teachers are evaluators, change agents, learning experts, and learners of feedback who are constantly engaged with dialogue and challenge. This practical guide, which includes questionnaires, scenarios, checklists, and exercises, will show any school exactly how to implement Hattie’s mindframes to maximize success.
